Innovation in Methodology and Practice in Language Learning Christopher Williams 2015-09-04 This volume is composed of 24 papers originally presented as talks at the VIII National Conference of the Italian Association of

University Language Centres (Associazione Italiana dei Centri Linguistici Universitari: AICLU), held at the University of Foggia, Italy, between 30 May and 1st June 2013. The contributions fall into five sections: 1) keynote addresses from plenary speakers; 2) innovative challenges for language centres; 3) new developments in teaching language for specific purposes; 4) proposals and case studies in Content and Language Integrated Learning; and 5) the use of new technologies in language learning. 18 papers are in English, four in Italian, one in French and one in German. The fact that three-quarters of the papers are in English reflects the way English has become the lingua franca of academic conferences today. However, in keeping with the ethos of CercleS (Confédération Européenne des Centres de Langues de l'Enseignement Supérieur, the pan-European organisation to which AICLU belongs), which is strongly committed to promoting plurilingualism, it was crucial that contributions would also be accepted in other languages. The volume represents the 'state of the art' in the field of language teaching and theory in university language centres not only in Italy, but also in other parts of Europe and the Mediterranean, and testifies to the rich variety of ways in which these centres are adapting and thriving in rapidly changing times.

Cognitive Approaches to English Mario Brdar

2009 The present volume contains a selection of papers presented at the conference Cognitive Approaches to English, an international event organized to mark the 30th anniversary of English studies at the Faculty of Philosophy, Josip Juraj Strossmayer University, Osijek, which was held in Osijek on October 18th "19, 2007.

The participants were invited to discuss issues in cognitive accounts of English, ranging from fundamental to methodological to interdisciplinary and applied. The volume is accordingly divided into four parts. Part I, Motivation in grammar, deals with various phenomena in the grammar of English in the broadest sense of the term, all of which are shown to be motivated by metaphorical and/or

metonymic operations. Part II, Constructing meaning (between grammar and lexicon), contains five chapters dealing with phenomena ranging from various peculiarities of form-meaning pairings (such as synonymy, polysemy, and figurative meanings) to concept formation. The four chapters that make up Part III are concerned with the phenomenon of interlinguistic and intercultural variation in the use of metaphorical and metonymic processes. The volume is concluded by Part IV, the three papers of which attempt to reconsider some TEFL issues from a cognitive linguistic point of view.

Corpora and Lexis 2018-05-29 The contributions in this volume provide a kaleidoscope of state-of-the-art research in corpus linguistics on lexis and lexicogrammar. Central issues are the presentation of major corpus resources (both corpora and software tools), the findings (especially about frequency)

which are simply not accessible without such resources, their theoretical implications relating to both lexical units and word meanings, and the practical – especially pedagogical – applications of corpus findings. This is complemented by a lexicographer's view on the data structures implicit in the Oxford English Dictionary (OED). The volume, which has sprung from the 36th ICAME conference, held in at Trier University in May 2015, will be of relevance for theoretical and applied linguists interested in corpora, word usage, and the mental lexicon.
