Language, Society, and New Media Marcel Danesi 2015-07-24 *Language, Society, and New Media* uses an interdisciplinary approach, integrating frameworks from sociolinguistics and linguistic anthropology and emerging strands of research on language and new media, to demonstrate the relationship between language, society, thought, and culture to students with little to no background in linguistics. Couched in this integrative "e-sociolinguistic" approach, each chapter covers the significant topics in this area, including language structures, language and cognition, and language variation and change, to elucidate this relationship, while also extending the purview of the field to encompass forms of new media, including Facebook and Twitter. Discussions are supported by a wealth of pedagogical features, including sidebars, activities and assignments, and a comprehensive glossary. In *Language, Society, and New Media*, Marcel Danesi explores the dynamic connections between language, society, thought, and culture and how they continue to evolve in today's rapidly changing digital world, ideal for students in introductory courses in sociolinguistics, language and culture, and linguistic anthropology.

**Language, Society, and Empowerment in Africa and Its Diaspora** Akinloyè Òjó 2022-09-06 Africa's diversity is best illustrated

linguistically. Thousands of endogenous and exogenous languages are linked to and central to the identity and reality of Africans. Language is a vital lens for analyzing these multifaceted challenges in Africa, where a deeper understanding of the entire linguistic landscape is germane to understanding sociopolitical and cultural systems. Concentrating on instrumental and emblematic functions of language in Africa, *Language, Society, and Empowerment in Africa and Its Diaspora* argues for the critical value of African languages beyond functionality into philosophical consideration of their importance for African unity and advancement. Akinloyè Òjó calls for the development and empowerment of African languages to serve in various domains, including the support of basic literacy and daily survival of their users. Òjó propagates ways to empower African languages for African sociocultural and economic development in the twenty-first century. The author productively engages works by linguists and language pedagogues to provide an ardent case for the empowerment of African languages in the renewed era of globalization, the internet, and an emergent Global Africa. Òjó posits and accentuates some of the notable modalities for empowering African languages in specialized domains for national and continental development.
