Learning to Teach in the Secondary School Sarah Younie 2026-05-29

This market leading text for beginning teachers on all undergraduate, postgraduate and school-based routes to qualified teacher status provides an essential introduction to the key skills and knowledge needed to become a successful teacher. Offering advice on all aspects of teaching and learning, this tenth edition has been thoroughly updated to reflect changes in the field and covers key new topics including artificial intelligence (AI), online pedagogies and working with your mentor. There are also expanded units on diversity and inclusion, teacher wellbeing and professional development. The text includes a wealth of examples, resources and tasks to support you in successfully applying theory to practice, and in critically reflecting on and analysing your practice to maximise pupil learning. The wide range of pedagogical features supports both school- and university-based work up to Master's level. Written by experts in the field, the 42 concise units are underpinned by evidence-informed practice and focus on what you need to know to thrive in the classroom, including: lesson planning; curriculum; managing behaviour; digital technologies and AI; effective communication with pupils; how pupils learn, cognitive development, educational neuroscience; assessment, marking and feedback; neurodivergent pupils, diversity and inclusion; special educational needs and disabilities (SEND); building resilience, managing stress, workload and time; applying for jobs and early career development. The book is extended and enhanced with digital resources available at

routledgelearning.com/learningtoteach. These include downloadable chapter-specific resources, links to useful websites, interactive quizzes and flashcards. You'll also find animated explainer videos and author-created videos, as well as specific online-only units covering England, Northern Ireland, Scotland and Wales. Supported by the subject-specific titles in the Learning to Teach Subjects in the Secondary School and A Practical Guide to Teaching Subjects in the Secondary School Series, this book is an essential purchase for every aspiring secondary school teacher.

Education and Training for 16-18 Year Olds in England and Wales

Joan Payne 1996 The reform of education and training at 16+ is the subject of lively debate. Politicians, employers, teachers, parents - all have prescriptions. This book aims to inform the debate by describing the choices that young people make within the present system, and the consequences of those choices. The book is based on a very large continuing survey of young people in England and Wales, the Youth Cohort Study. It traces the fortunes of five national cohorts who reached 16 between the mid-1980s and early 1990s, following each group through their first few years after compulsory schooling.

Learning to Teach Physical Education in the Secondary School

Susan Capel 2013-04-15 This book focuses on the requirements of student PE teachers in relation to teaching skills and issues covered in PGCE and initial teacher education courses. The new edition of this popular textbook draws together background information about teaching and about PE, basic teaching skills specifically related to physical education and broader knowledge and understanding of issues in the wider context of PE. The book is organized so that each chapter contains text and underpinning theory interspersed with activities that student teachers are asked to undertake either alone, with another student teacher, or with a tutor. This is not a book of teaching tips but promotes critical thinking and reflection to enable student PE teachers to develop into reflective practitioners. Learning to Teach Physical Education in the Secondary School is an essential resource for any student teacher undertaking PGCE or school-based initial teacher education to become a

teacher of PE in secondary schools.

Learning to Teach in the Secondary School Susan Capel 2019-04-11

For all undergraduate, postgraduate and school-based routes to qualified teacher status, Learning to Teach in the Secondary School is an essential introduction to the key skills and knowledge needed to become a secondary teacher. Underpinned by evidence-informed practice and focussing on what you need to know to thrive in the classroom, the eighth edition is fully updated in light of changes in the field, covers new topics and provides additional guidance on topics such as developing your resilience, using digital technologies, closing the achievement gap and using data to inform your teaching and pupil learning. The text includes a wealth of examples and tasks to demonstrate how to successfully apply theory to practice and how to critically reflect on and analyse your practice to maximise pupil learning. The wide range of pedagogical features supports both school- and university-based work up to Masters level. Written by experts in the field, the 37 concise units create unit-by-unit coverage that can be dipped into, offering guidance on all aspects of learning to teach including: Managing your workload Lesson planning Curriculum Motivating pupils Promoting behaviour for learning Assessment, marking and feedback Special educational needs and disabilities (SEND) Applying for jobs, developing as a professional and networking Learning to Teach in the Secondary School provides practical help and guidance for many of the situations and potential challenges you are faced with in school. The text is extended by a companion website that includes additional information as well as specific units covering England, Northern Ireland, Scotland and Wales. Supported by the subject-specific titles in the Learning to Teach Subjects in the Secondary School Series, it is an essential purchase for every aspiring secondary school teacher.
