An experiment usually tests a hypothesis, which is an expectation about how a particular process or phenomenon works. However, an experiment may also aim to answer a "what-if" question, without a ... Mar 16, 2026 · This is one easy science experiment that never fails to astonish. With carefully placed scissor cuts on an index card, you can make a loop large enough to fit a (small) human body through! EXPERIMENT definition: 1. a test done in order to learn something or to discover if something works or is true: 2. to try.... Learn more. Apr 17, 2025 · If you want to conduct a science experiment, first come up with a question you want to answer, then devise a way to test that question. Make sure you have a control, or an untested ... Jan 1, 2023 · By definition, an experiment is a procedure that tests a hypothesis. A hypothesis, in turn, is a prediction of cause and effect or the predicted outcome of changing one factor of a situation. An experiment can be thought of as a specific type of method used in scientific inquiries, and personal questioning, usually to study causality. Often the objective is to test a hypothesis: that is, a tentative ... EXPERIMENT definition: a test, trial, or tentative procedure; an act or operation for the purpose of discovering something unknown or of testing a principle, supposition, etc.. See examples of experiment ... Mar 10, 2026 · A laboratory experiment is a study conducted in a controlled environment where a researcher deliberately changes one factor to observe its effect on an outcome. Just as the worldly novel tends to do, most of us dodge and deny this fundamental experiment, since the revelation would seem to rob life of the jewel of meaning. experiment n 1. a test or investigation, esp one planned to provide evidence for or against a hypothesis: a scientific experiment 2. the act of conducting such an investigation or test; experimentation; research
