Raphael's Ostrich Una Roman D'Elia 2016-01-12 Raphael's Ostrich begins with a little-studied aspect of Raphael's painting—the ostrich, which appears as an attribute of Justice, painted in the Sala di Costantino in the Vatican. Una Roman D'Elia traces the cultural and artistic history of the ostrich from its appearances in ancient Egyptian hieroglyphs to the menageries and grotesque ornaments of sixteenth-century Italy. Following the complex history of shifting interpretations given to the ostrich in scientific, literary, religious, poetic, and satirical texts and images, D'Elia demonstrates the rich variety of ways in which people made sense of this living "monster," which was depicted as the embodiment of heresy, stupidity, perseverance, justice, fortune, gluttony, and other virtues and vices. Because Raphael was revered as a god of art, artists imitated and competed with his ostrich, while religious and cultural critics complained about the potential for misinterpreting such obscure imagery. This book not only considers the history of the ostrich but also explores how Raphael's painting forced viewers to question how meaning is attributed to the natural world, a debate of central importance in early modern Europe at a time when the disciplines of modern art history and natural history were developing. The strangeness of Raphael's ostrich, situated at the crossroads of art, religion, myth, and natural history, both reveals lesser-known sides of Raphael's painting and illuminates major cultural shifts in attitudes toward nature and images in the Renaissance. More than simply an examination of a single artist or a single subject, Raphael's Ostrich offers an accessible, erudite, and charming alternative to Vasari's pervasive model of the history of sixteenth-century Italian art.

Frontiers in the Middle Ages Fédération internationale des instituts d'études médiévales 2006 The first uses of the term *frontiere* in thirteenth-fourteenth-century French were military, referring to the first line of troops in a battle. In architecture it meant the front of a building, and at the end of the fourteenth century it was first used as a geographical term, in Spain specifically about the divide between the Christians and the Muslims. More than obstacles, medieval frontiers - whether geographical, political, military, intellectual or artistic - seem to have been bridges and points of contact. Frontiers was the theme of the Third European Congress of Medieval Studies organised by the FIDEM in Jyväskylä, Finland, in 2003. True to the nature of the FIDEM, it was highly interdisciplinary, bringing together scholars from all over the world, addressing problems ranging from Byzantine administration to Icelandic vernacular scribal culture, during a week of extraordinary intellectual excitement. This volume brings together forty-four contributions by specialists of history, history of ideas, medieval philosophy, philology, linguistics, literature as well as manuscript and archival studies.

**The Grove Encyclopedia of Medieval Art and Architecture** Colum Hourihane 2012 This volume offers unparalleled coverage of all aspects of art and architecture from medieval Western Europe, from the 6th century to the early 16th century. Drawing upon the expansive scholarship in the celebrated 'Grove Dictionary of Art' and adding hundreds of new entries, it offers students, researchers and the general public a reliable, up-to-date, and convenient resource covering this field of major importance in the development of Western history and international art and architecture.

**The Arthur of the Italians** 2014-04-15 This is the first comprehensive book on the Arthurian legend in medieval and Renaissance Italy since Edmund Gardner's 1930 *The Arthurian Legend in Italian Literature*. Arthurian material reached all levels of Italian society, from princely courts with their luxury books and frescoed palaces, to the merchant classes and even popular audiences in the piazza, which enjoyed shorter retellings in verse and prose. Unique assemblages emerge on Italian soil, such as the *Compilation of Rustichello da Pisa* or the innovative *Tavola Ritonda*, in versions made for both Tuscany and the Po Valley. Chapters examine the transmission of the French romances across Italy; reworkings in various Italian regional dialects; the textual relations of the prose *Tristan*; narrative structures employed by Italian writers; later ottava rima poetic versions in the new medium of printed books; the Arthurian-themed art of the Middle Ages and Renaissance; and more. *The Arthur of the Italians* offers a rich corpus of new criticism by scholars who have brought the Italian Arthurian material back into critical conversation.
