IMO/ILO/UNECE Code of Practice for Packing of Cargo Transport Units (CTU Code) International Labour Office 2016 The use of freight containers, swap bodies, vehicles or other cargo transport units substantially reduces the physical hazards to which cargoes are exposed. However, improper or careless packing of cargoes into/onto such units may be the cause of personnel injury or serious and costly damage to the cargo or equipment. A great many people in the transport chain rely on the skill of those working in cargo transport units, including road vehicle drivers and other road users, rail workers, crew members of vessels on inland waterways, handling staff at transfer terminals, dock workers, crew members of seagoing ships, those inspecting cargoes and those who unpack the units. This code of practice outlines best practices for cargo transport units. Co-published with the IMO and UNECE.

IMDG Code International Maritime Organization 2014 The International Maritime Dangerous Goods Code relates to the safe carriage of dangerous goods by sea, but does not include all details of procedures for packing of dangerous goods or actions to take in the event of an emergency or accident involving personnel who handle goods at sea. Within a continuing process of revision of publications that are relevant to the IMDG Code, the EmS Guide: Emergency Response Procedures for Ships Carrying Dangerous Goods was further amended at the eighty-seventh session of MSC in May 2010, and the details are described in MSC.1/Circ.1360. Also at the at the ninetieth session of MSC in May 2012 and ninety-third session of MSC in May 2014, and the details are described in MSC.1/Circ.1438 and MSC.1/Circ.1476 respectively. The Supplement also includes texts of the Medical First Aid Guide, descriptions of the reporting procedures for incidents involving dangerous goods, harmful substances and/or marine pollutants, the International Code for the Safe Carriage of Packaged Irradiated Nuclear Fuel, Plutonium and High-Level Radioactive Wastes

on board Ships and other appropriate Assembly resolutions, resolutions and circulars of the Maritime Safety Committee and circulars of the Facilitation Committee and of the Sub-Committee on Dangerous Goods, Solid Cargoes and Containers. The following circulars have been added to the present edition: MSC.1/Circ.1439: Conversion table (record of amendments) for part 7 requirements of the IMDG Code concerning transport operations; MSC.1/Circ.1440: Illustrations of segregation of cargo transport units on board containerships and ro-ro ships; MSC.1/Circ.1442: Inspection programmes for cargo transport units carrying dangerous goods

Marine Pollution Control Iliana Christodoulou-Varotsi 2018-04-24 This book discusses in a concise manner the key aspects that are important for the understanding of regulations and managerial framework governing marine pollution. It identifies the practical context in which marine pollution comes into play and addresses the international legal regime governing the numerous sources of marine pollution, as well as the ways in which these regulations affect the conduct of day-to-day shipping operations. With illustrations, case studies, emphasis boxes, references to case law and to national jurisdictions and other tools facilitating understanding and knowledge, readers will find helpful guidance on: the sources of marine pollution (including ship-source pollution and pollution from the offshore oil and gas sector); the forms of cooperation needed in order to tackle the prevention, management and response to marine pollution; overview of MARPOL Convention, other key IMO conventions, and selected regional regimes; legal ramifications, including P & I Clubs and limitation of liability; involvement of the flag State, coastal State and port State; industry best practice; the human element Marine Pollution Control will be a useful guidance tool for shipping Industry professionals, (P & I) Clubs, Legal practitioners, maritime administrators, as well as academics and students of marine pollution.

Imdg Code International Maritime Organization 2014 The International Maritime Dangerous Goods (IMDG) Code was developed as a uniform international code for the transport of dangerous goods by sea covering such matters as packing, container traffic and stowage, with particular reference to the segregation of incompatible substances. The IMDG Code, as amended by Amendment 37-14, is mandatory from 1 January 2016 but may be applied by Administrations in whole or in part on a voluntary basis from 1 January 2015. The Code has undergone many changes over the years, in both format and content, in order to keep up with the rapid expansion of the shipping industry. Amendment 37-14 includes revisions to various sections of the Code and to transport requirements for specific substances. It was adopted by IMO's Maritime Safety Committee (MSC) at its ninety-third session in May 2014. The code lays down basic principles: detailed recommendations for individual substances, materials and articles, and a number of recommendations for good operational practice, including advice on terminology, packing, labelling, stowage, segregation and handling, and emergency response action

SOLAS, Consolidated Edition 2014 International Maritime Organization 2014 Of all the international conventions dealing with maritime safety, the most important is the International Convention for the Safety of Life at Sea, 1974, as amended, better known as SOLAS, which covers a wide range of measures designed to improve the safety of shipping. The Convention is also one of the oldest of its kind: the first version was adopted in 1914 following the sinking of the Titanic with the loss of more than 1,500 lives. Since then there have been four more versions of SOLAS. The present version was adopted in 1974 and entered into force in 1980. In order to provide an easy reference to all SOLAS requirements applicable from 1 July 2014, this

edition presents a consolidated text of the SOLAS Convention, its Protocols of 1978 and 1988 and all amendments in effect from that date. The SOLAS Consolidated Edition 2014 is an essential reference for maritime administrations, ship manufacturers, owners and operators, shipping companies, education institutes and all others concerned with requirements of the International Convention for the Safety of Life at Sea.

Sustainability in the Maritime Domain Angela Carpenter 2021-05-29 This volume explores options for a sustainable maritime domain, including maritime transportation, such as, Maritime Spatial Planning (MSP), maritime education and training, maritime traffic and advisory systems, maritime security. Other activities in the maritime domain covered in the book include small-scale fisheries and sustainable fisheries, and greening the blue economy. The book aims to provide the building blocks needed for a framework for good ocean governance; a framework that will serve through the next decade and, and hopefully, well beyond the 2030 milestone of the UN Agenda for Sustainable Development. In short, this book brings together the problems of the current world and sustainable solutions that are in the development process and will eventually materialize in the not so distant future. Additionally, the book presents a trans-disciplinary analysis of integral sustainable maritime transportation solutions and crucial issues relevant to good ocean governance that have recently been discussed at different national, regional and international fora, highlighting ongoing work to develop and support governance systems that facilitate industry requirements, and meet the needs of coastal states and indigenous peoples, of researchers, of spatial planners, and of other sectors dependent on the oceans. The book will be of interest to researchers across many disciplines, especially those that are engaged in cross-sectoral research and developments in the maritime transport sector and across the wider maritime domain. To this end, the book covers areas including natural and social sciences, geographical studies, spatial planning, maritime security and gender studies, as they relate to transport and the wider maritime sector. In addition, the book explores frameworks for sustainable ocean governance being developed under the UN's Agenda for Sustainable Development to 2030. It will also look beyond the 2030 milestone under that Agenda, and will be of use to national and international policymakers and practitioners, government actors at the EU and other regional and national levels and to researchers of ocean governance, sustainability and management, and maritime transport.
