Environmental Consequences of International Conflicts Aleksander V. Semenov 2025-01-23

This is the first of two volumes that, taken together, provide an integrated picture of the environmental consequences arising from international conflicts. The volumes build upon the successful book *Environmental Consequences of War and Aftermath* published in *The Handbook of Environmental Chemistry* in 2009. The books focus on environmental consequences only and discuss land degradation, erosion, water scarcity and pollution, water resources management, air pollution, desertification, deforestation, food scarcity and radioactive contamination, among others. This volume addresses conflicts in the

MENA region (Middle East and North Africa), covering historical and more recent events such as water conflicts, military conflicts, migration and overpopulation, and infrastructure projects. Readers will also find several chapters in this book on the theory of international conflicts and their impact on the environment in general.

Given its breadth, this book appeals to environmental scientists, policy makers, and researchers interested in the environmental impacts of international conflicts.
