Concepts & Calculations in Analytical Chemistry, Featuring the Use of Excel
Henry Freiser 1992-03-17
Concepts & Calculations in Analytical Chemistry: A Spreadsheet Approach offers a novel approach to learning the fundamentals of chemical equilibria using the flexibility and power of a spreadsheet program. Through a conceptual presentation of chemical principles, this text will allow the reader to produce and digest large assemblies of numerical data/calculations while still focusing on the chemistry.

introduction to clinical laboratory science at various levels, including CLS/MT, CLT/MLT, and Medical Assisting, and reflects the taxonomy levels of the CLS/MT and CLT/MLT exams. Detailed full-color illustrations show what you will see under the microscope. An Evolve companion website provides convenient online access to all of the procedures in the text, a glossary, audio glossary, and links to additional information. Case studies include critical thinking and multiple-choice questions, providing the opportunity to apply content to real-life scenarios. Learning objectives help you study more effectively and provide measurable outcomes to achieve by completing the material. Streamlined approach makes it easier to learn the most essential information on individual disciplines in clinical lab science. Experienced author, speaker, and educator Mary Lou Turgeon is well known for providing insight into the rapidly changing field of clinical laboratory science.

Convenient glossary makes it easy to look up definitions without having to search through each chapter. NEW! Procedure worksheets have been added to most chapters; perforated pages make it easy for students to remove for use in the lab and for assignment of review questions as homework. NEW! Instrumentation updates show new technology being used in the lab. NEW! Additional key terms in each chapter cover need-to-know terminology. NEW! Additional tables and figures in each chapter clarify clinical lab science concepts.

Problem Solving in General Chemistry Ronald A. DeLorenzo 1981

Tumescent Technique Jeffrey A. Klein 2000 TUMESCENT TECHNIQUE is the definitive reference on all aspects of the tumescent technique of anesthesiology used in

liposuction. Written by the inventor of the tumescent technique, this resource explains the pathophysiology, complications, pharmacology, and the different methods used to achieve great cosmetic results. Step-by-step instructions demonstrate how to perform this procedure on all areas of the body.

Complications and postoperative care are also addressed. * Written by Dr. Klein, a leading expert in the field and the physician who invented and perfected the technique. * Provides step-by-step instructions for administering the local anesthesia with a practical, easy-to-follow approach. * Discusses tumescent liposuction techniques for each body region, addressing procedures, guidelines, and complications for each. * Covers complications and how to avoid them, preventing problems before they arise. * Provides detailed illustrations of techniques and before and after photographs to allow you to see expected results.

Basic Calculations for Chemical and Biological Analysis

Bassey J. S. Efiok 2000 Like the 1993 edition, this iteration does not assume that students, lab technicians and scientists have mastered the prerequisite calculation skills for quantitative problems in the chemical/ biomedical sciences. A new chapter focuses on using spreadsheets and laboratory information management systems. Other chapters cover calculations and techniques relevant to reagents, chemical reactions, properties of gases and solutions, pH and buffer preparation, spectrophotometry, enzyme assays, and radioactivity. Also included are derivations of some key equations, quick reference guides, and an index to the practical examples. Efiok is with the National Heart, Lung, and Blood Institute, National Institutes of Health. Eduok is in the chemistry department at Xavier U. of Louisiana. c. Book News Inc.
