*The Role of Culture in Social Media Marketing. A Systematic Literature Review* Nivedha Mahendran 2019-03-11 Master's Thesis from the year 2018 in the subject Business economics - Offline Marketing and Online Marketing, grade: 1,7, University of Bamberg, language: English, abstract: This present master thesis examines the role of culture on "Social Media Marketing" being a form of modern marketing and a bundle of marketing-related activities using social media. With the help of a systematic literature review, answers are sought to the question as to which extent cultural differences influence the effectiveness of social media marketing. The main objective is to adequately present the state of research on the interdisciplinary topic and to identify research gaps. The findings from peer-reviewed journals ascribe an indispensable value to the cultural component and illuminate the topic from different contemporary relevant perspectives. The results indicate that social media marketing is generally covered from a cultural point of view. Moreover, the insights provide valuable knowledge from both consumers research perspective and from applied social media practices in multicultural settings. However, the findings also reveal extant research gaps in several directions that need to be addressed in the near future to provide theoretical approaches and scientifically proven evidence on successful utilization of social media marketing in multicultural settings. The fact that social media plays an extremely important component in the worldwide dynamic technology development is an irrefutable fact. Companies are forced to integrate social media in the most diverse areas in order to be lucrative in the long term, to save costs and to survive in competition. Typical fields of application include all departments that deal with external corporate communication, e.g. HR for recruiting and talent acquisition, PR for professionally maintaining a favorable public image or in the marketing department as revolutionary marketing and sales platforms. According to a new study, 69% of marketing employees stated that marketing activities on social media helped to increase important marketing indicators and strengthen customer and brand loyalty. Nevertheless, social media offer great opportunities, but also hold challenges. A major challenge is to choose the right medium which depends to a great extent on the target group.

*Two Decades of Multimedia Storytelling in Digital Journalism* Rosanna Planer 2024-05-31 Located within the field of journalism research, this book deals with multimedia storytelling in digital journalism. It focuses on the very fundamental question of how previously established forms of presentation can and have evolved in the digital age. Using a multi-method design, it first conducts a systematic literature analysis of international studies on the selected topic (n=381). Hypotheses derived from this study serve as the basis for a quantitative content analysis of more than 1,700 multimedia stories from German and US media companies, which also forms the core of the analysis. In a final step, the thesis discusses these findings with journalists and story producers from Germany and the USA (n=21). Overall, multimedia stories were produced in a complex and resource-intensive manner just a decade ago, but have since developed into an established and consolidated format in editorial departments. Technological development, the focus on the needs of the audience and the "turn to mobile" are determining the future of the format.

**Language Learning Beyond the Classroom** Jocelyn Guevarra 2026-03-05 Essay from the year 2026 in the subject Didactics - English, , course: Language Teaching, language: English, abstract: This essay examines the role of social media in second language acquisition (SLA), situating its impact within established theories and empirical research. Drawing on Krashen's Input Hypothesis, Vygotsky's Sociocultural Theory, and Wenger's Communities of Practice, it shows how platforms such as YouTube, TikTok, Instagram, and Facebook provide authentic input, foster interaction, and support identity construction. Empirical studies indicate that active participation in online communities enhances vocabulary, pragmatic competence, intercultural awareness, and learner motivation. At the same time, challenges such as misinformation, distraction, fragmented learning, and unequal access complicate its integration into formal pedagogy. The essay argues that social media functions as a hybrid learning environment, bridging formal and informal processes while reshaping learner autonomy and cultural participation. By critically assessing both opportunities and limitations, it underscores the need for pedagogical frameworks that help learners navigate digital spaces responsibly and inclusively. Ultimately, the essay contributes to debates in applied linguistics by positioning social media as a powerful yet complex force in language education, with implications for practice, equity, and future research.
