### E-Commerce, Marketing, and Consumer Behavior in the AI

Era J. Obaid, Ahmed

2024-12-20 With the rapid growth of e-commerce, business activities have shifted to web platforms, allowing users to browse products and read customer reviews to inform their purchases.

Customer reviews significantly influence buying decisions, with users sharing experiences, ratings, and recommendations on products and services.

However, fake reviews have become a challenges, as spammers may post misleading information that can deceive potential buyers. Detecting these fraudulent reviews is essential to maintaining trust in online platforms. E-Commerce, Marketing, and Consumer Behavior in the AI Era explores the complexities of fake review detection,

covering recent research, detection methods, and challenges in maintaining authentic online review systems. It discusses technologies and best practices in understanding and combating fraudulent activities in the digital landscape.

Covering topics such as brand trust, information technology, and workforce optimization, this book is an excellent resource for online platform operators, digital marketing and branding professionals, researchers, academicians, regulatory agencies, and more.

Series, Authors, and Titles.

*Traditional Textiles of the Indian Subcontinent* Akhtarul Islam Amjad 2025-07-09 This book explores the cultural history of traditional textiles and their contemporary relevance in sustainable practices. It focuses on manufacturing processes, technological integration, and design fundamentals of traditional textiles. The book also highlights the fusion of traditional textiles with contemporary fashion trends and the efforts made by designers to preserve and promote heritage textiles. It also provides information on manufacturing, designing, and sustainable engineering in traditional textiles, offering practical guidance and case studies for a comprehensive understanding. This book

serves as a valuable reference to a wide range of individuals who have an interest in traditional textiles, including scholars, students, engineers, and manufacturers in the fields of textile engineering, fashion design, cultural studies, and sustainable studies. For scholars, educators, students, and researchers, it provides a comprehensive understanding of the relationship between traditional textiles, sustainability, and engineering, serving as a foundation for further academic exploration. Artisans and craftsmen can gain insights into sustainable practices and innovative design approaches, empowering them to adapt their craft to contemporary demands while preserving cultural heritage. Policymakers and NGOs can use the book to inform policy decisions and interventions related to cultural preservation, sustainable development, and the protection of traditional craftsmanship. Textile industry professionals can acquire knowledge of sustainable

engineering and design principles, enabling them to integrate eco-friendly practices into textile manufacturing and design processes. Designers and fashion professionals can be inspired to incorporate traditional textile elements into contemporary fashion, promoting cultural diversity and sustainability in the global fashion industry.

*Crude Drugs of Unani Medicine*  
Shaikh Ajj Ahmad Makbul  
2025-10-14 This novel two-volume compilation presents scientific knowledge pertaining to the utilization of crude drugs, encompassing data on pharmacology and phytochemistry, ethnomedical applications, as well as the influence of adulterants and substitutes on human health for the prevention, treatment, and management of diseases. Volume 1: Application and Utility for Human Welfare explores both the theoretical

and practical aspects of potential medicinal plants and their bioactive compounds, either used individually or in combination within drug formulations, to combat a broad spectrum of chronic ailments, such as skin diseases, liver disorders, musculoskeletal conditions, reproductive system dysfunctions, immunological aberrations, and various other health issues. Volume 2: Phytochemistry and Pharmacology Aspects provides a comprehensive understanding of the pharmacology, phytochemistry, and pharmacovigilance of medicinal plants utilized in the traditional Unani system of medicine. It discusses the extensive range of possibilities presented by traditional medicine that enables the utilization of potential therapeutic agents in the form of standardized extracts, in conjunction with other herbs or as isolated bioactive constituents. These agents possess diverse properties such as antiparasitic, antifungal, antiviral, antibacterial,

antioxidant, and anticancer activities, which can be utilized as drug treatments for various systemic disorders.

### Handbook of

### Metallonutraceuticals

Yashwant Vishnupant Pathak  
2014-04-28 The nutritional and medicinal value of metals, such as zinc, calcium, and iron, has been known in traditional medicine for a long time. Other metals, such as silver and gold, may also have therapeutic and health benefits. Ancient medicines have long incorporated their use in the treatment of diseases, and they have also more recently been explored for treatment in allopathic medicine, birthing the concept of metallonutraceuticals. The challenge of using metals in the human body is to find forms that are safe and effective. Handbook of Metallonutraceuticals presents basic concepts related to the nutritional and therapeutic use of metals, product development strategies, and some ideas ready to be applied for condition-specific

metallonutraceuticals. The book begins with an overview of the nutraceuticals field and the need for metallonutraceuticals. It considers the roles of various metals in metabolism, reviews the ethnopharmacology and ethnomedicine of metals, and covers the characterization and possible properties of metallonutraceuticals. It also examines bioavailability and drug interactions, and therapeutic applications of nanometals including use as imaging agents, in cancer diagnosis and treatment, as antibacterials and antivirals, in ocular disease, and in neurodegenerative diseases. The book explores the use of metals in traditional Chinese medicine, potential applications for metalloenzymes, the use of nanosilver in nutraceuticals, and the potential of gold nanoparticles as a drug delivery system. In addition, it addresses intellectual property rights and regulatory considerations regarding metallonutraceuticals. Using

an interdisciplinary approach, this user-friendly text provides a knowledge base and inspiration for new research in this exciting field.

Nanotechnology Based Advanced Medical Textiles and Biotextiles for Healthcare

Prashansa Sharma 2024-05-27

This book provides systematic coverage of research into medical and biotextiles based on nanomaterials as applicable in healthcare. Divided into three sections, it explains manufacturing, properties, types, and recent developments in nanotechnology based medical textiles backed by case studies. It includes a wide range of different clinical applications of biotextiles for healthcare including nanotextile scaffolds, nano-based artificial organs, surgical sutures, enzymatic assisted enhanced biotextiles, tissue engineering or drug delivery system via nanofibers, and so forth. Features: Provides strong and broad overview of medical applications in the field of nano and biotextiles. Highlights different

approaches, recent research, and emerging innovations.

Covers designing or developing nanomaterials based antiviral surface disinfectants with self-cleaning property. Reviews different applications of nano based medical textiles such as deodorizing or pH control clothing for hygiene maintenance. Includes the real-life applications based descriptive case studies that offer a diverse range of perspectives. This book is aimed at researchers and graduate students in textile technology and engineering, and medical textiles.

**Industry 4.0** Ravi Kant

2023-11-10 This book presents a comprehensive discussion of the recent advances in Industry 4.0, manufacturing processes, and intelligent techniques. It will serve as an ideal reference text for graduate students and academic researchers in the fields of manufacturing engineering, industrial engineering, mechanical engineering, and production

engineering. This text introduces Industry 4.0, its evolution, and essential pillars of Industry 4.0 including calibration, metrology, quality control, robotics, artificial intelligence, and the Internet of Things. It comprehensively covers important topics including the cold spray technique for additive manufacturing, tool condition monitoring, robotic manipulators, metrology, quality control, and the Internet of Things in Industry 4.0. The book: Discusses additive manufacturing and applications of lasers in advanced manufacturing Covers sensors, actuators, and calibration techniques for next-generation industries Emphasizes the recycling of materials for sustainable manufacturing Explores latest advances in the Internet of Things, robotics, artificial intelligence, and machine learning in view of Industry 4.0 Provides a conceptual framework of Industry 4.0 with the help of applications and case studies The text is

primarily written for graduate students and academic researchers in the fields of manufacturing engineering, industrial engineering, mechanical engineering, and production engineering.
