Tohu are environmental indicators developed and used by Māori to signal, monitor and forecast changes in the natural environment. New Zealand's climate can be defined as 'temperate' meaning we experience mild weather conditions. However, every so often we experience extreme weather and climate events. Wind is air in motion, both near the earth's surface and high up in our atmosphere. Air is made of molecules, such as nitrogen and oxygen, and when these molecules move together in a direction, we ... Desert climates are very dry, hot regions where there is very little rainfall. Deserts are usually rocky or sandy because the little rainfall they receive makes it difficult for plants to grow there. Most deserts ... The climate of New Zealand is incredibly varied for a

country of its size. The warm, sunny beaches and lush forests of Northland contrast sharply with the snow-capped Southern Alps and dry tussock fields ... One of the most serious types of extreme weather to affect New Zealand are tropical cyclones. Cyclones require very warm ocean temperatures of 27°C or greater.
