Digital Degrowth Michael Kwet 2024-08-20 'A fascinating book that takes degrowth in new directions' - Jason Hickel, author of *Less is More* 'A must-read for anyone who wants to know the brutal truth of digital colonialism driven by the American empire' - Kohei Saito, author of *Slow Down* The world is racing toward an irreversible ecological catastrophe. Environmental science makes clear that humans must reduce total material resource use, requiring a radical redistribution of wealth within and between countries. Yet little attention has been paid to how the digital economy fits into this equation. Michael Kwet, a leading expert on digital colonialism, presents a new paradigm for the digital society. Merging the science of degrowth with a global analysis of the high-tech economy, he argues that digital capitalism and colonialism must be abolished quickly. In *Digital Degrowth*, Kwet maps out a path to a people's tech future. He calls for direct action against Silicon Valley, US imperialism and power elites everywhere in order to realize a radically egalitarian digital society that fosters equality in harmony with nature.

Paper-Based Optical Chemosensors Liang Feng

2024-11-13 Paper-based Optical Chemosensors comprehensively discusses the origin, development, and current state-of-the-art in paper-based sensors. With a focus on the principles, classifications, methodology, design, and application of paper-based sensors, this book represents a developing research field with recent innovative applications resulting in a comprehensive presentation of the different physico-chemical techniques using paper sensors. It discloses underlying rules and factors in paper-based sensors and discusses intricate sensing systems and working environments by ways of chemistry and physics for a variety of application scenarios such as environmental protection, food safety, public safety, and clinical diagnosis. This is a valuable resource for researchers who major in analytical chemistry, or for those who are interested in the development of methods or devices for rapid analysis/monitoring based on paper/membrane-based sensors who wish to broaden their knowledge in the allied field. - Presents a comprehensive discussion on the current state, challenges, and future perspectives of paper-based optical chemosensors - Offers discussions on the classification, methodology, design, and application of paper based sensors - Provides opportunities for readers to design paper based sensors with specific purpose and deeper awareness
