Quantitative Decision Making with Spreadsheet Applications

Lawrence L. Lapin 2002

Written for students with a background in algebra, this text provides a complete and modern treatment of basic management science methodology. The authors survey the variety and power of management science tools, working to alleviate students' apprehension about the subject and to enable students to recognize on-the-job situations in which management science methodology can be successfully employed.

Emphasizing modeling skills for students of varying mathematical backgrounds, the authors explain how to use Microsoft Excel spreadsheets to build skills as they work through problems. In general, problems are broken into several parts to make difficult concepts easy for students to

learn. This book's modular structure affords instructors maximum flexibility. This text contains a special student version of Palisade Corporation's DecisionTools Suite, containing @Risk, PrecisionTree, BestFit, TopRank and RiskView. This software is expressly provided for student use and requires student authorization to unlock the software for its full one year license. Professional customers may use the software for 30 days at which point they must contact Palisade Corporation for a professional version should they wish to continue using the software.

Operations Management R. Dan Reid 2024-06-26
Operations Management: An Integrated Approach, 8th edition, provides a solid foundation of the subject with

clear, guided instructions and a balance between quantitative and qualitative concepts, thus providing both an applied and practical approach. In addition to leveraging customizable, tactile teaching and learning methods, the text covers emerging topics like artificial intelligence, robotics, data analytics, and sustainability. This international edition includes several revisions and additions to the content, including updated company examples across all chapters, updated discussions with regard to the latest technologies that impact operations and supply chain management, and revised problems in all chapters. In addition, the edition includes a new “Pandemic Effects” box that addresses how the chapter topic has evolved or changed during the COVID-19 pandemic and how it is evolving in a post-pandemic environment.

Algorithms in Engineering,
Business, Economics, and
Finance* Vasant, Pandian M.

2012-09-30 Optimization techniques have developed into a significant area concerning industrial, economics, business, and financial systems. With the development of engineering and financial systems, modern optimization has played an important role in service-centered operations and as such has attracted more attention to this field. Meta-heuristic hybrid optimization is a newly development mathematical framework based optimization technique.

Designed by logicians, engineers, analysts, and many more, this technique aims to study the complexity of algorithms and problems. Meta-Heuristics Optimization Algorithms in Engineering, Business, Economics, and

Finance explores the emerging study of meta-heuristics optimization algorithms and methods and their role in innovated real world practical applications. This book is a collection of research on the areas of meta-heuristics optimization algorithms in engineering, business, economics, and finance and aims to be a comprehensive reference for decision makers, managers, engineers, researchers, scientists, financiers, and economists as well as industrialists.
