The Philosophical Review Jacob Gould Schurman 1899 An international journal of general philosophy.

The Philosophical-Theological Contributions of Hans Jonas Luca Settimo 2024-12-29 This book presents systematically and comprehensively the entire philosophical-theological perspective of the famous Jewish thinker Hans Jonas. Jonas is a philosopher who has written extensively across different philosophical topics and is particularly renowned for his work in ethics. Throughout his extensive career he has also published many theological reflections in different articles and book chapters; some of these, however, are not well known in the Anglophone world given that, up until now, they have never been translated into English. In this book, Dr Luca Settimo engages with all these texts to provide a fuller, more comprehensive understanding of Jonas's philosophical theology. This book presents Jonas's reflections on (i) St Paul and St Augustine, (ii) cosmogony, (iii) theodicy and (iv) his argument for God's existence. This book argues that Jonas's contributions in these four areas are strictly related to his ethical project, given their powerful implications for human responsibility in protecting the sacredness of all life (human life in primis) and the care of creation. Moreover, this work reveals that Jonas's theological reflections on these topics complement his understanding of natural science; Jonas's proposal acts as the antidote for reductionist/determinist approaches in modern science which have the effect of 'desacralising' the natural world. Settimo strongly contends that Jonas's theological contributions can enrich Christian theology while concomitantly fostering a fruitful dialogue between theologians and modern natural scientists. Through a careful search in the literature he identifies and discusses the work of approximately forty Christian theologians who have engaged with Jonas's perspective. This book also outlines the existence of several notable 'dialectical tensions' in Jonas's view of God (i.e. a description of God as a Being who is concomitantly transcendent and immanent). Additionally, a critical assessment of Jonas's theology is provided: Settimo identifies and discusses some contradictions between Jonas's reflections and Christian orthodoxy; he then suggests using specific theological frameworks to provide different correctives for these problematic issues. These correctives enable to remain faithful to Jonas's perspective whilst also remaining compatible with Christian orthodoxy. Finally, Settimo explores how other scholars (both Jonas's contemporaries and those preceding him) may have influenced and motivated Jonas in his theological reflections: this exercise is key to fully understand, appreciate, and position Jonas's perspective in relation to other philosophical-theological schools. The book will appeal to researchers and students of theology, philosophy and intellectual history. It will also be of interest to those seeking meaningful dialogues (from a philosophical and theological perspective) between science and religion and/or between Christianity and Judaism.

Religion and the Natural Sciences James E. Huchingson 2005-02-07 The first half of 'Religion and the Natural Sciences' is an introduction to the discussion of science and religion. Here the reader learns why there is any debate at all and what resources exist for responding to it. The second half deals with specific issues that arise in the individual sciences, from astronomy and physics to biology and ecology. Any project hoping to connect science and religion must supply the categories of connection, which are found primarily, although not exclusively, in philosophy. The simplicity of the arrangement and the nature of the selections are intended to make 'Religion and the Natural Sciences' available to as wide an audience as possible, including students from the sciences and technology, the professions, the humanities and liberal studies, and theology.
