**Retirement by Design** Ida Abbott 2020-03-10  
Find out how harnessing the powerful business principles of design thinking can make retirement your best chapter in life. There is no one right time or way to retire. Retirement is a major life transition; but if you spend the time designing a future filled with promise and possibilities, the prospect can be utterly exciting and revitalizing. In *Retirement by Design*, professional mentor and coach Ida Abbott shows you how the innovative business principles behind design thinking can be applied to plan a rich, fulfilling, and more meaningful retirement. Her guided workbook uses a business-like approach to leaving business, making your switch much smoother and less jolting. Whether you're considering a new place to settle down, working through financial planning, strategizing how to unwind a business, or deciding on which organizations you want to stay engaged with, making critical decisions takes a lot of organization, thought, and planning. Abbott shows how the five principles of design thinking will revolutionize your retirement-planning process: Empathy: Get inside the shoes of your future self. What will be important to that version of you? Define: Hone in on what is and will be most critical for you to focus on (whether it's volunteering, family, activities, or skills). Ideate: Draw, scribble, brainstorm, and throw around as many different retirement scenarios as you can come up with. Prototype: If retiring across the country in Arizona sounds perfect—try it out first. Come up with opportunities to test out your scenarios with short trips and trial time off. Test: This is the fun part—get back to the drawing board and try more retirement scenarios (and future versions of yourself) before sitting down to make those life-changing decisions. The new and innovative, self-coaching approach of *Retirement by Design* helps you spearhead and navigate a major next step in life. Whether your retirement is 10 years away or swiftly approaching, this workbook ensures you will create a future that is perfectly tailored to you.

Animation Masterclasses: From Pencils to Pixels

Tony White 2022-11-17 Today, it is commonly believed that if you learn software, you can become an animator. Yet nothing could be further from the truth. Master animators are trained and not born. Software, as is the humble pencil, is merely yet another tool through which an animator can apply their knowledge.

However, neither software nor pencils give you that knowledge, nor do they do the work for you. If you place a fully trained master animator on a computer, or give them a pencil, they'll astound

you with their mastery. However, if you put a nontrained animator on a computer, all you will have is a technician creating moving objects □ as you'll see all over YouTube and other video platforms. This book teaches you exactly how to become a Master Animator--whether you ultimately plan to use pencils, computers, drawing tablets or rigged characters. It's a complete course, being a collection of 48 masterclasses gleaned from the author's 50 years of experience of top-level animating, teaching, and filmmaking. It will also train you in the value and application of observational gesture drawing. This book of masterclasses by a master of the art, Tony White, is entirely designed to be THE definitive reference book for students learning how to make things move well as well as how to create films once you know how to do so. A book for everyone: For home-based, self-study students : It is a perfect manual to take you from raw beginner to proven animated filmmaker. For full-time students : It is an ideal companion to supplement your full-time educational studies, which, no doubt, is overly based on software technology. For current animation professionals : It is a comprehensive archive of animation tips and techniques that will enable you to take your work to the next level. For current animation educators and instructors : It is a book that can be the ultimate curriculum and study program, enabling your own students to become the master animators of today and tomorrow.
