**Translation and Own-Language Use in Language Teaching** Eva Skopečková  
2024-04-06 This book reconsiders the role of translation and own-language use in the EFL (English as a Foreign Language) classroom. It shows prospective teachers how to use the learners' own language and translation optimally. The author surveys

current research about the EFL classroom and presents both a theoretical framework and a didactic model for using translation and learners' mother tongues. This is done through an action research project, assessing the proposed didactic model for optimal translation practice in English Language teaching (OTP in ELT) through its integration into teacher education. The book will be of interest to students and researchers in the areas of Translation Studies and Applied Linguistics (particularly EFL, ESL, TEFL and TESOL), as well as educators and designers of pre-service training programmes for language teachers.

### **English in Non-English-Speaking Countries**

Marjana G. Vaneva 2022-04-13 Living in a modern world, and being surrounded by the newest advances in technology, today's English language teachers see the process of learning English as completely different compared to when they learnt it themselves. In addition, linguists today proudly witness the different usage of the language that portrays the playful nature of English, supported by its creative speakers and users. This book presents a collection of English language teachers' practices and challenges of teaching English to their non-native English students, in which they portray their perceptions of the teaching-learning process. These experiences will provide the reader with a perspective on what contemporary teaching of this language in a non-English-speaking country looks like. As such, this collection will serve as a guidebook for new scholars in the field.
