Data Abstraction and Problem Solving with Java, Walls and Mirrors, Updated Edition (International Edition) Frank Carrano

Data Abstraction and Problem Solving with C++ Frank M. Carrano 1998 "Focusing on data abstraction and data structures, the second edition of this very successful book continues to emphasize the needs of both the instructor and the student. The book illustrates the role of classes and abstract data types (ADTs) in the problem-solving process as the foundation for an object-oriented approach. Throughout the next, the distinction between specification and implementation is continually stressed. The text covers major applications of ADTs, such as searching a flight map and performing an event-driven simulation. It also offers early, extensive coverage of recursion and uses this technique in many examples and exercises. Overall, the lucid writing style, widespread use of examples, and flexible coverage of material have helped make this a leading book in the field." --Book Jacket.

Data Structures and the Standard Template Library William Joseph Collins 2003 "DATA STRUCTURES AND THE STANDARD TEMPLATE LIBRARY by William Collins teaches the fundamentals of Data Structures and their implementations. It uses C++ as the language of instruction. Most of the data structures are provided in the Standard Template Library (STL), which students will be able to use in their further coursework and beyond. To further students' understanding of implementation issues, alternative implementation (other

than the STL) are also discussed. Hands-on learning is promoted throughout the text by the use of Programming Projects and labs. Programming projects, at the end of each chapter, allow students to develop and implement their own data structures or to extend or apply data structures introduced in the chapter. Additionally, optional labs accompany the text and allow students to practice by giving them opportunities to code. These labs can be used in many different ways such as in a closed lab, in an open lab, or for optional homework assignments"--Publisher description.

Data Abstraction and Problem Solving with Java Frank M. Carrano 2006 The second edition, in Java, of the classic Walls and Mirrors approach to programming designs solutions to problems using both data abstraction (the walls) and recursion (the Mirrors).Data Abstraction and Problem Solving with Java: Walls and Mirrors, 2eprovides a focus on the important concepts of data abstraction and data structures in a way that beginning programmers find accessible. The first part of the book covers problem-solving techniques including a review of Java fundamentals, principles of programming and software engineering, recursion and data abstraction, and linked lists. Later chapters focus on problem solving with abstract data types including stacks, queues, algorithm efficiency and sorting, trees, and graphs. This edition contains enhanced material on OO implementation. MARKET: Readers searching for problem solving solutions through abstraction, algorithmic refinement, data structures and recursion.
