Action Research as a Living Practice Terrance R. Carson 1997 This book aims to enlarge understandings of educational action research. Drawing from complexity theory, deep ecology, Eastern philosophy, hermeneutics, phenomenology, psychoanalysis, postmodernism, and literary theory, the essays in this collection show how participation in educational action research practices requires more of the researcher than the application of research methods. Each essay demonstrates how action research is a lived practice that asks the researcher to not only investigate the subject at hand but, as well, to provide some account of the way in which the investigation both shapes and is shaped by the investigator.

Situation Comedy, Character, and Psychoanalysis D.T. Klika 2018-01-25 Situation Comedy, Character, and Psychoanalysis puts the sitcom character on the analyst's couch and closely examines the characters of Basil Fawlty, Lucy Ricardo and Kim from Australia's Kath & Kim, in order to reveal the essential elements that must exist in a sitcom before even the first joke is written. Original in its approach, D.T. Klika uncovers major findings about the sitcom as well as human behavior and relationships that we find 'arresting' and even "familial". By offering a new way of reading the sitcom using psychoanalytic theory, this book can be used as a basis for engaging in critical discourses as well as textual analysis of programs. Psychoanalytic theory enables a reading of character motivations and relationships, in turn elucidating the power struggle that exists between characters in this form of comedy. Situation Comedy, Character, and Psychoanalysis shines a light on what is at play in the sitcom that makes us laugh, and why we love the characters we do, only to discover that this form of comedy is more complex than we first thought.

Art and Soul Howard McConeghey 2003-03-31 Internationally known artist Howard McConeghey argues that perception is the very essence of life and making art is our most elegant and accessible expression of it. Freeing us from the paralysis of traditional art "training," he breaks the chains of modernism and its constrictive "eye," allowing anyone -be they an artist, an art therapist, or simply a soul-searcher -to find beauty and create it. McConeghey builds a psychological case for art as a universal healer. Working against the onslaught of modern-day skepticism, technology, and rationalism, art may be one of our last avenues to finding soul. And reaching for the images and archetypes that each of us can see in our mind's is the first step. Lushly illustrating his book with reproductions of paintings and drawings from art history's classics to those in art therapy, McConeghey does what only a great master can do: he delivers complex material on a silver platter, making it a pleasure to read and a joy to experience.

Through the Goddess Patricia Reis 1991 "Drawing on her wide background in depth psychology, art, and archeology, Patricia Reis gives a unique feminist reading to the meaning of the Goddess. Through personal experience and reflection, through women's creative productions, and above all through examples from the lives of women she has guided in her practice of therapeia, Through the Goddess shows the indwelling Goddess to be a much-needed resource for physical, spiritual, and psychological healing." "Utilizing pre-patriarchal Goddess images for inspiration and information, Reis shows how the earliest Goddess images provide important bedrock symbols of female wholeness that are lacking in the later Greek Goddesses who are often patriarchally influenced and reflect instead the suffering and fragmented aspects of women, which correspond to contemporary women's struggles for self-acceptance." "Reis further develops a newly emerging archetype: that of the female body. Through the work of women poets and artists, Reis shows how women today can heal personally and collectively from abuse, incest, eating disorders, and from the sometimes devastating effects of breast cancer by initiation into and through the Goddess."--BOOK JACKET. The Flight into The Unconscious Wolfgang Giegerich 2020-03-06 Psychological analysis usually sets its

sights upon the patient or upon cultural phenomena such as myths, literature, or works of art. The essays in this volume, by contrast, have another addressee, another subject matter: psychology itself. Deeply informed by Jung's insight regarding the discipline's lack of an objective vantage point outside and beyond the psyche, their Jungian author again and again turns Jung's contribution to psychology around upon itself in the spirit of an immanent critique. Cutting to the quick, the question is put: in its constitution as psychology is Jungian psychology up to the level of what its insight into psychology's lack of an Archimedean point would require? Are the interpretations it gives of its various subject matters—alchemy, religion, the unconscious and the rest-matched by its interpretation of itself? Has its meeting itself in them had consequences for itself, consequences in terms of the fathoming of its own truth? Or clinging to the standpoint of empirical observer, did it ultimately demur with regards to the question of their truth and its own - this despite Jung's having characterized his work as an opus divinum? Topics include Jung's psychology project as a response to the condition of the world, the "smuggling" inherent in the logic of "the unconscious," the closure and setting free dialectic of alchemy and psychology, the blindness to logical form problematic, the faultiness of the opposition "Individual" and "Collective", Jung's communion fiasco, his thinking the thought of not-thinking, the veracity of his Red Book, the disenchantment complex, and, as indicated in the title of this volume, Jung's psychology project as a counter-speculative "flight into the unconscious."

Sabina Spielrein Angela M. Sells 2017-07-25 Explores the life and work of psychoanalyst Sabina Spielrein through a feminist and mytho-poetic lens. Long stigmatized as Carl Jung's hysterical mistress, Sabina Spielrein (1885-1942) was in fact a key figure in the history of psychoanalytic thought. Born into a Russian Jewish family, she was institutionalized at nineteen in Zurich and became Jung's patient. Spielrein went on to earn a doctorate in psychiatry, practiced for over thirty years, and published numerous papers, until her untimely death in the Holocaust. She developed innovative theories of female sexuality, child development, mythic archetypes in the human unconscious, and the death instinct. In *Sabina Spielrein*, Angela M. Sells examines Spielrein's life and work from a feminist and mytho-poetic perspective. Drawing on newly translated diaries, papers, and correspondence with Jung and Sigmund Freud, Sells challenges the suppression of Spielrein's ideas and shows her to be a significant thinker in her own right. This book is a major, perhaps a definitive, contribution to the literature. Angela Sells documents both the demonization of a great psychoanalytic theorist—mainly because she was a woman and worse still, was once Carl Jung's patient. The book's greatest strength is its power to enlighten and inform and in so doing, to arouse indignation and amazement at Spielrein's brilliance and tenacity. Phyllis Chesler, author of *Women and Madness* This is a pathbreaking piece of research that not only begins to rehabilitate the reputation of a woman patient of Jung's, but also suggests that Spielrein was an important contributor in her own right to the beginnings of psychoanalysis. Carol P. Christ, coauthor of *Goddess and God in the World: Conversations in Embodied Theology*

Symmetry Marc J. Straus 2000 In this second book of poems, oncologist Marc J. Straus addresses the hopes and the tragedies of his profession. The work is a commentary on his experience in the medical field and a collection of rich, vivid monologues written from the points of view of both doctor and patient. These poems show a rare sensitivity not only to those who are suffering but also to the details that distinguish each life.

The Woman Beneath the Skin Barbara Duden 1991 In this study the author asserts that the most basic biological and medical terms we use to describe our own bodies - male and female, healthy or sick - are indeed cultural constructions. To illustrate this, Barbara Duden delves into the records of an 18th-century German physician who documented the medical histories of 1800 women of all ages and backgrounds, often in their own words.
