The International Convention for the Prevention of Pollution from Ships Henrik Ringbom 2025-02-12

This Commentary presents an in-depth exploration of what is widely regarded as the most important International Maritime Organization (IMO) convention on vessel source pollution. Leading international experts provide an authoritative analysis of the International Convention for the Prevention of Pollution from Ships 1973/78 and its subsidiary instruments, collectively known as MARPOL.

Towards a Zero-Emissions and Digitalized Transport Sector
Ellen J. Eftestøl 2024-09-06

Bringing together an interdisciplinary team of contributors, this book tackles the legal, logistical and supply chain challenges facing the transport sector in the context of climate change and technological development. In particular, it focuses on the European Union, which has placed a strong emphasis on ensuring future sustainability. This title contains one or more Open Access chapters.

SOLAS, Consolidated Edition

2014 International Maritime Organization 2014 Of all the international conventions dealing with maritime safety, the most important is the International Convention for the Safety of Life at Sea, 1974,

as amended, better known as SOLAS, which covers a wide range of measures designed to improve the safety of shipping. The Convention is also one of the oldest of its kind: the first version was adopted in 1914 following the sinking of the Titanic with the loss of more than 1,500 lives. Since then there have been four more versions of SOLAS. The present version was adopted in 1974 and entered into force in 1980. In order to provide an easy reference to all SOLAS requirements applicable from 1 July 2014, this edition presents a consolidated text of the SOLAS Convention, its Protocols of 1978 and 1988 and all amendments in effect from that date. The SOLAS Consolidated Edition 2014 is an essential reference for maritime administrations, ship manufacturers, owners and operators, shipping companies, education institutes and all others concerned with requirements of the International Convention for the Safety of Life at Sea.

Port Management and

Operations Patrick M. Alderton 2005 Port Management and Operations, 2nd edition is the only book that provides a complete picture of port management and is a crucial guide to all those involved in the maritime industry.

The Elgar Companion to the Law and Practice of the International Maritime Organization Laura Carballo Piñeiro 2024-09-06 This Companion sheds light on the law and practice of the International Maritime Organization (IMO), which plays a key role in securing safe, secure, and efficient shipping on clean oceans. Laura Carballo Piñeiro and Maximo Q. Mejia Jr. bring together a diverse range of international experts to outline the development and impact of the IMO as an institution.

Ocean Yearbook 20 Elisabeth M. Borgese 2005-10 Devoted to assessing the resources, technology and ecology of the world's oceans, the Ocean Yearbook provides this information to its worldwide

audience in one convenient, easy-to-use resource. As in previous editions, each article in Ocean Yearbook 20 provides a unique perspective and case study written by an expert in the field, allowing readers to learn from specialists without having to decipher field-specific jargon. Each new volume contains key international documents and an annually updated global directory of ocean-related organizations. In addition to appendices featuring the Report of the International Ocean Institute, 2004 and other selected documents and proceedings, topics covered in Ocean Yearbook 20 include: Environment and Coastal Management Living Resources Ocean Governance Maritime Transport and Security Education and Training Ocean Yearbook is a collaborative initiative of the International Ocean Institute and the Marine and Environmental Law Programme at Dalhousie University Law School, Halifax, Nova Scotia, Canada. Published

under the Transnational Publishers imprint. Review of Maritime Transport United Nations Conference on Trade and Development. Secretariat 2010 *An Assessment of Assessments: Regional and supra-regional summaries and technical annexes* 2009 The "Assessment of Assessments" (AoA) is a start-up phase of a regular process for global reporting and assessment of the state of the marine environment including socio-economic aspects. AoA represents the most comprehensive initiative undertaken to date by the UN system to better coordinate ocean governance. Its central recommendation calls for a mechanism that builds on existing global, regional and national institutions and processes while integrating all available information, including socio-economic data, on how our seas and oceans are actually being used.-- Publisher's description. **Procedures for Port State Control 2011** International Maritime Organization 2012

Port state control (PSC) involves the inspection of foreign ships in national port areas to verify that the condition and operation of a ship and its equipment comply with the requirements of international regulations. While IMO has always acknowledged that enforcement of global maritime standards is the responsibility of flag states, the organisation nevertheless recognises that exercising the right to carry out Psc makes an important contribution to ensuring those standards are implemented consistently on ships of different nationalities. The sub-committee on flag state implementation has developed and maintained a framework to promote the global harmonisation and co-ordination of Psc activities resulting in the adoption of resolution A.1052(27) by the assembly of November 2011. This resolution contains the Procedures for port state control, 2011, and revokes resolutions A.787(19) and A.882(21).

Enforcing International Maritime Legislation on Air Pollution through UNCLOS

Jesper Jarl Fanø 2019-12-26

This book explores the scope and applicability of the United Nations Convention on the Law of the Sea (UNCLOS), relating to the enforcement of international maritime legislation on air pollution. It focuses on enforcement of Annex VI of the International Convention for the Prevention of Pollution from Ships (MARPOL Annex VI) and the strengthened global sulphur limit which comes into force in 2020. The first chapters in Part I provide an overall introduction to relevant regulations of MARPOL Annex VI, UNCLOS, Port State Control (PSC), the EU Sulphur Directive and basic jurisdictional principles of international law. Part II analyses the amplified enforcement and notifying obligations of UNCLOS chapter XII placed on flag States and the broadened jurisdictions for

port and coastal States to enforce. This includes extraterritorial enforcement by port States on the high seas and how overlapping jurisdictions are resolved. These theoretical discussions on jurisdiction are tied to practical applications pertaining to PSC and sanctioning. Part III builds upon the conclusions of Part II in relation to the enforcement of other legislation adopted by the International Maritime Organization (IMO), including regulations on Greenhouse Gases (GHG) which the IMO is set to adopt through its GHG Strategy. Finally, with the increased environmental challenges relating to global warming, and given the special legal status of ships, Part IV offers an analysis of whether specific IMO regulations on GHG could, in the future, be considered peremptory norms of a 'jus cogens' character, and addresses the potential legal implications.

Report of the Technical Consultation to Review Port State Measures to Combat Illegal, Unreported and Unregulated Fishing : Rome, 31 August - 2 September 2004

Technical Consultation to Review Port State Measures to Combat Illegal, Unreported and Unregulated Fishing 2004 The objectives of the Technical Consultation were to address substantive issues relating to the role of the port State in combating Illegal, Unreported and Unregulated fishing and to address principles and guidelines for the establishment of regional memoranda on port States measures to prevent, deter and eliminate IUU fishing.

Following its deliberations, the Technical Consultation approved a Model Scheme on Port State Measures to Combat

IUU Fishing, strongly supported the proposed Programme of Assistance to facilitate human development and institutional strengthening in developing countries to promote the full and effective implementation of port States measures to combat IUU fishing, and supported the establishment of a database concerning relevant port State measures.
