### **Dynamics of Critical Internet Culture**

**(1994-2001)** Geert Lovink 2009 This study examines the dynamics of critical Internet culture after the medium opened to a broader audience in the mid 1990s. It is Geert Lovink's PhD thesis, submitted late 2002, written in between his two books on the same topic: *Dark Fiber* (2002) and *My First Recession* (2003). The core of the research consists of four case studies of non-profit networks: the Amsterdam community provider, The Digital City (DDS); the early years of the nettime mailinglist community; a history of the European new media arts

network Syndicate; and an analysis of the streaming media network Xchange. The research describes the search for sustainable community network models in a climate of hyper growth and increased tensions and conflict concerning moderation and ownership of online communities.

### **Dimensions of Curiosity**

Nancy Workman 2004-02-09 This book is a celebration of the 50th anniversary of the Lewis University College of Arts and Sciences. Editors Nancy Workman and Therese Jones bring together a variety of Lewis University educators and administrators to examine the purpose, history, and practice of liberal learning, while preparing for the future of education.

**Raising the Bar** Alvin L. Reid  
2002 Two-thirds of today's  
teens are interested in having a  
meaningful relationship with  
God, yet less than one-third of  
them are active in a local  
church. These statistics  
indicate that it is time to  
change how the church does  
youth ministry, and this  
compelling book provides an  
impassioned plea for the  
church to set higher standards  
for ministry to teens and their  
families.

**The Future Just Happened**  
Michael Lewis 2001 An  
investigation of how new  
technology affects our lives.  
This book explores how digital  
technology and the Internet  
has changed the way we live. It  
argues that not only do we  
have the easiest access to more  
information than ever before,  
but that this has changed our  
attitudes to life.

The New York Times bestseller.  
"His book is a wake-up call at a  
time when many believe the  
net was a flash in the

pan."—BusinessWeek With his  
knowing eye and wicked pen,  
Michael Lewis reveals how the  
Internet boom has encouraged  
changes in the way we live,  
work, and think. In the midst of  
one of the greatest status  
revolutions in the history of the  
world, the Internet has become  
a weapon in the hands of  
revolutionaries. Old  
priesthoods are crumbling. In  
the new order, the amateur is  
king: fourteen-year-olds  
manipulate the stock market  
and nineteen-year-olds take  
down the music industry.  
Unseen forces undermine all  
forms of collectivism, from the  
family to the mass market: one  
black box has the power to end  
television as we know it, and  
another one may dictate  
significant changes in our  
practice of democracy. With a  
new afterword by the author.  
*Harvard Business Review* 2001  
*Books and Beyond* Kenneth  
Womack 2008-10-30 There's a  
strong interest in reading for  
pleasure or self-improvement  
in America, as shown by the  
popularity of Harry Potter, and  
book clubs, including Oprah

Winfrey's. Although recent government reports show a decline in recreational reading, the same reports show a strong correlation between interest in reading and academic achievement. This set provides a snapshot of the current state of popular American literature, including various types and genres. The volume presents alphabetically arranged entries on more than 70 diverse literary categories, such as cyberpunk, fantasy literature, flash fiction, GLBTQ literature, graphic novels, manga and anime, and zines. Each entry is written by an expert contributor and provides a definition of the genre, an overview of its history, a look at trends and themes, a discussion of how the literary form engages contemporary issues, a review of the genre's reception, a discussion of authors and works, and suggestions for further reading. Sidebars provide fascinating details, and the set closes with a selected, general bibliography. Reading in America for pleasure and

knowledge continues to be popular, even while other media compete for attention. While students continue to read many of the standard classics, new genres have emerged. These have captured the attention of general readers and are also playing a critical role in the language arts classroom. This book maps the state of popular literature and reading in America today, including the growth of new genres, such as cyberpunk, zines, flash fiction, GLBTQ literature, and other topics. Each entry is written by an expert contributor and provides a definition of the genre, an overview of its history, a look at trends and themes, a discussion of how the literary form engages contemporary issues, a review of the genre's critical reception, a discussion of authors and works, and suggestions for further reading. Sidebars provide fascinating details, and the set closes with a selected, general bibliography. Students will find this book a valuable guide to

what they're reading today and will appreciate its illumination of popular culture and contemporary social issues.

**Images in Law** William Pencak 2016-05-13 What does 'the law' look like? While numerous attempts have been made to examine law and legal action in terms of its language, little has yet been written that considers how visual images of the law influence its interpretation and execution in ways not discernible from written texts. This groundbreaking collection focuses on images in law, featuring contributions that show and discuss the perception of the legal universe on a theoretical basis or when dealing with visual semiotics (dress, ceremony, technology, etc.). It also examines 'language in action', analyzing jury instructions, police directives, and how imagery is used in conjunction with contentious social and political issues within a country, such as

the image of family in Ireland or the image of racism in France.
