Teaching Cases in Tourism, Hospitality and Events Saurabh Kumar Dixit 2023-02-28

The tourism, hospitality and events industries comprise one of the largest and most diverse workforces in the world, creating high demand for graduates with strong technical and managerial competencies. Case-based learning encourages students to think, understand, and apply the concepts and theories they're taught into practical, everyday situations faced in the world of work. Providing a broad selection of extensive global cases, this book forms a comprehensive one-stop-shop resource for readers to test their analytical skill and abilities in solving complex management issues. Cases include teaching notes to reflect theoretical perspectives, as well as questions, detailed learning activities and solutions. A useful and engaging read for students of tourism, hospitality and events, this book is also a valuable compilation of examples of practice for people working in industry.

Enough with the S t u f f (Something That U Find Frustrating) Dr. Kim D. Kirkland

2015-03-16 Dealing with Workplace "stuff": Something that u find frustrating. In the workplace, it's only a matter of time before we misstep, mis-communicate, misunderstand, or inadvertently denigrate someone else's culture, values, traditions, customs, religion, or feelings. Many employees are offended by compliments on their appearance; by water-cooler conversations about religion, politics, or sexual orientation; by an unwelcome touch on the shoulder, arm, or back; or by any cultural transgression—intentional or not. Even some of the smallest infractions can create anxiety or anger among coworkers. While most of these issues are framed as harassment or discrimination, most likely they are the result of

a miscommunication potentially grounded in cultural differences. We spend 40+ hours a week with our coworkers, but these professional relationships suffer when we are unable to talk to one another or give each other permission to make mistakes—which is the only way to gain a better understanding of cultural differences.

This type of understanding doesn't come from the company's EEO or diversity leader, and it doesn't come from the organization's code of conduct or human resources. In order to bridge this diversity divide, we must begin to communicate with one another. *stuff* offers practical strategies for dealing with "stuff"—the things we find frustrating—and gives organizational professionals permission to fondly reach for the term "stuff" when identifying and addressing employee conflict, rather than mislabeling the offending behaviors as harassment and discrimination. This fun, easy-to-follow guide is a must for any professional who hopes to champion civility, non-discrimination, equity, and justice in the workplace.

Rethinking Virtual Places Erik M. Champion 2021-11-30 How would the humanities change if we grappled with the ways in which digital and virtual places are designed, experienced, and critiqued? In *Rethinking Virtual Places*, Erik Malcolm Champion draws from the fields of computational sciences and other place-related disciplines to argue for a more central role for virtual space in the humanities. For instance, recent developments in neuroscience could improve our understanding of how people

experience, store, and recollect place-related encounters. Similarly, game mechanics using virtual place design might make digital environments more engaging and learning content more powerful and salient. In addition, Champion provides a brief introduction to new and emerging software and devices and explains how they help, hinder, or replace our traditional means of designing and exploring places. Perfect for humanities scholars fascinated by the potential of virtual space, Rethinking Virtual Places challenges both traditional and recent evaluation methods to address the complicated problem of understanding how people evaluate and engage with the notion of place.

Matteson & McConnell's Gerontological

Nursing Adrienne Dill Linton 2007 Matteson & McConnell's Gerontological Nursing, 3rd Edition provides comprehensive, research-based information on nursing care of older adults.

Beginning with the basics, the text uses a systems approach to describe the aging process from wellness to illness. It also describes physiological and psychological aspects of aging in detail, as well as assessment and practice in all settings using the nursing process. Each chapter incorporates a research and theory-based approach to the aging process. Content is comprehensive and focuses on caring for the older adult. The text examines the differences between normal aging conditions and clinical problems/conditions. Competencies and Roles in Gerontological Nursing section focuses on the process that nurses, especially clinical nurse specialists, use to impact gerontological nursing care. Nursing care plans provide the practitioner with nursing care scenarios applied to clinical practice. Expanded content on functional assessment, including addressing communication issues, both verbal and non-verbal, alerts the reader to vital issues that may affect the patient's plan of care. Color insert visually complements material on the integumentary section as it illustrates some of the major integumentary conditions affecting the gerontologic population. Reflections boxes written by experts across different nursing fields share personal experiences related to the chapters' content. Toward Better Health boxes provide key considerations for promoting

healthy lifestyles. Assessment boxes emphasize specific physical tests and observations to make when assessing a patient. Age-Related Changes boxes detail the ways in which particular body systems are affected by the aging process. New chapters on End of Life Care, Evidence-Based Practice, and Assisted Living Care give the reader a more comprehensive look at gerontological nursing care.

Fictional Games Stefano Gualeni 2022-12-15

What roles do imaginary games have in storytelling? Why do fiction authors outline the rules of a game that the audience will never play? Combining perspectives from philosophy, literary theory and game studies, this book provides the first in-depth investigation into the significance of fictional games within fictional worlds. Drawing from contemporary cinema and literature, from The Hunger Games to the science fiction of Iain M. Banks, Stefano Gualeni and Riccardo Fassone introduce five key functions that different types of imaginary games have in worldbuilding. First, fictional games can emphasize the dominant values and ideologies of the fictional society they belong to. Second, some imaginary games function in fictional worlds as critical, utopian tools, inspiring shifts in the thinking and political orientation of the fictional characters. Third, a few fictional games are conducive to the transcendence of a particular form of being, such as the overcoming of human corporeality. Fourth, imaginary games within works of fiction can deceptively blur the boundaries between the contingency of play and the irrevocable seriousness of "real life", either camouflaging life as a game or disguising a game as something with more permanent consequences. And fifth, they can function as meta-reflexive tools, suggesting critical and/or satirical perspectives on how actual games are designed, played, sold, manipulated, experienced, understood and utilized as part of our culture. With illustrations in every chapter bringing the imaginary games to life, Gualeni and Fassone creatively inspire us to consider fictional games anew: not as moments of playful reprieve in a storyline, but as significant and multi-layered expressive devices.
