Whether you're a practicing cataloger looking for a short text to update you on the application of RDA to cataloging records or a school librarian who needs a quick resource to answer cataloging questions, this guide is for you. Since the last edition of this invaluable text was published, the library world has experienced a revolution in descriptive cataloging the likes of which has not been seen since the early 1980s. This updated, third edition of an established and well-respected guide makes it easy for you to stay in step with those monumental changes. The book will help you understand the latest fundamentals of cataloging so you can get items on the library shelves quickly and efficiently. Every chapter has been revised. Changes in standards, including RDA and BISAC, that were alluded to in the second edition are discussed in depth and illustrated with explanations, and sample problem sets are included so you can put theory into practice. In addition, the book provides you with clear headings for easy scanning as well as cheat sheets and templates for creating records for book and non-book items. Previous editions of this text have been used by library practitioners and library and information science professors across the country because of its spot-on, easy-to-follow guidance on cataloging for school libraries. This new edition builds upon those strengths, adding everything you need to know about current, groundbreaking changes.

The Complete College Catalog Book Ronald H.

Kacmarczyk 1984-01-01 A sourcebook on producing college catalogs is presented, with attention to marketing, information to be included in the catalog, presentation of the material, writing style, photographs, and assembling the finished publication. Marketing research is needed to promote the college effectively either to traditional students or to new segments of the market. The development of student and institutional profiles is part of the marketing research process. Catalog editors need to be informed on legislation and regulations affecting college promotional and informational materials. The catalog should include information on the school location, accreditation, admissions requirements, degrees offered, expenses, financial aid, housing, libraries and laboratories, academic requirements, support services, student life, and description of courses. Examples of biased or flawed writing and unbiased writing are included, and reference books that are helpful to the writer are identified. Proofreading and the use of a computer for creating the catalog are also addressed. Additional topics include: printing on newsprint; copy preparation; typesetting; design, layout, and formatting; and mailing and distribution. Examples of a marketing ad, a table of contents, and a page design are included, along with a bibliography. (SW)
