Oral Communication Larry A. Samovar 1980

Motivating Minds Elisheva Zeffren 2017-06-27 Would you like to establish an animated classroom atmosphere where students are motivated to gain skills, absorb knowledge, express opinions, and examine alternatives? Would you like your students to reflect on the quality of their thinking and learning? With her usual eloquence, Elisheva Zeffren articulates students' need to think critically, formulate conclusions, and uncover what is relevant and important to modern life. The lucid writing style, easy-to-read charts, creative exercises, practical and concrete goals, make this book simple to revisit. Educators can take the innovative ideas back to their classrooms and implement them with little or no preparation.

Communication Larry Lee Barker 1996 This work introduces students to the communication process by stressing how to improve vital communication skills in the 1990s and beyond. It acquaints students with communication theory, listening, nonverbal, intrapersonal, interpersonal, group, organizational, public and mass communication. The authors describe the eight basic elements of the communication process: the source, receiver, message, channel, feedback, barriers, context or situation, and communication system.

Communicating for Success Cheryl Hamilton 2023-02-28 *Communicating for Success*, third edition, is a core textbook for Introduction to Communication courses and gives students an overview of the subfields of Communication Studies and how these areas provide practical, fun, and immediate applications to students pursuing a wide variety of career paths, as well as practical instruction in public speaking for success on today's social media platforms. This fully updated third edition focuses on the key communication competencies recommended by the National Communication Association, including verbal and nonverbal communication, listening, interpersonal communication and conflict resolution, group and organizational communication, public speaking, leadership, and the roles of social media, technology, culture, gender, and ethics in communication. With a vibrant and engaging design, this volume is packed with applied features including practical scenarios and examples, key terms, discussion questions, sample activities, learning objectives, and more. A concentrated focus on the influence of communication on careers in business, education, and healthcare is highlighted in a two-page career spread at the end of each chapter and takes lessons beyond the classroom. New features in this edition include a greater focus on public speaking in the workplace; emphasis on demographic and behavioral factors in audience analysis; and increased discussion of issues of social justice and equity. Online resources for instructors include PowerPoint slides and an Instructor's Manual with guidance on how to use the book's activities in both in-person and online courses.

Public Speaking Deanna D. Sellnow 2003 Class-tested by over forty instructors for the past three years, Deanna Sellnow's exciting new textbook provides a contemporary and comprehensive alternative

approach to the public speaking process. Reflecting the latest in communication research yet fully focused on the needs of today's students, 'Public Speaking' showcases both innovative and time-tested strategies to help readers learn and apply the skills necessary to become effective public speakers. Unique coverage of "learning styles" as they apply both to the speaker and audience is highlighted and integrated throughout the text. Students are taught how to assess their own learning styles and how to apply their knowledge of different learning styles both to their analysis of audiences and in the presentation of their speeches.

The Natural Speaker Randy Fujishin 1996-07 Literary studies in the postwar era have consistently barred attributing specific intentions to authors based on textual evidence or ascribing textual presences to the authors themselves. *Obscure Invitations* argues that this taboo has blinded us to fundamental elements of twentieth-century literature. *Widiss* focuses on the particularly self-conscious constructions of authorship that characterize modernist and postmodernist writing, elaborating the narrative strategies they demand and the reading practices they yield. He reveals that apparent manifestations of "the death of the author" and of the "free play" of language are performances that ultimately affirm authorial control of text and reader. The book significantly revises received understandings of central texts by Faulkner, Stein, and Nabokov. It then discusses Eggers' *Heartbreaking Work of Staggering Genius* and the films *Seven* and *The Usual Suspects*, demonstrating that each is a highly self-aware rebuttal of the notion of authorial absence.

Communicating for Success Cheryl M. Hamilton 2016-07-22 This text focuses student-learning on the key communication competencies recommended by the National Communication Association. With applied examples and a vibrant and engaging design, this text covers all the expected topics in an introductory course (foundations of communication, interpersonal communication, small group communication, and public speaking - plus a special appendix on interviewing). Scenarios begin each chapter with a problem to which students can relate and then solve as they learn about the concepts discussed in each chapter. A concentrated focus on careers in communication, highlighted in a two-page spread near the end of each chapter, brings home the relevance of communication outside the classroom and helps students learn more about how studying communication can help them throughout their lives. Additional emphasis on topics such as ethics, culture, gender, and technology is found throughout the text.

An Environmental Education Approach to the Training of Elementary Teachers 1988

Speech in the Elementary School Mardel Ogilvie 1954 The author states that the three purposes of the book are to suggest ways to promote effective communication in the elementary-school classroom, to indicate the speaking activities that are part of the language-arts program, and to note the part the classroom teacher plays in improving the child's speech. Many speech activities are suggested, but the important place of poetry is stressed. Poetry is far too frequently omitted from classroom- activities, partially because of teachers' lack of security in handling it with children; the author's treatment of this subject should help to bolster the confidence of young teachers and encourage them in the use of poetry. A chart lists the aims of speech education and information about the growth of children in language, and should be a helpful guide. A practical book with many examples of actual classroom experiences and school activities, of children's problems related to speech, and of faulty co-operation in dealing with such problems. The major responsibility, of course, for speech training in the school lies with the classroom teacher.
