

Fluid Statics Problems And Solutions

The meaning of FLUID is having particles that easily move and change their relative position without a separation of the mass and that easily yield to pressure : capable of flowing. Fluids flow easily and take on the shape of their containers. All liquids and gases are fluids. fluid adjective (LIKELY TO CHANGE) If situations, ideas, or plans are fluid, they are not fixed and are likely to change, often repeatedly and unexpectedly: A fluid is a state of matter that yields to sideways or shearing forces. Liquids and gases are both fluids. Fluid statics is the physics of stationary fluids. A situation that is fluid is unstable and is likely to change often. The situation is extremely fluid and it can be changing from day to day. In contrast, liquids deform easily when stressed and do not spring back to their original shape
