U.S. Naval Institute Proceedings 1914 Development of Small-scale Industries During the New Order Government in

Indonesia Tulus Tahi Hamonangan Tambunan 2017-11-22 This title was first published in 2000: As in many other LDCs, in Indonesia small-scale industries (SSIs) are important, particularly with respect to the creation of employment opportunities. SSIs are expected to absorb many millions of workers who have been displaced by current economic crisis. This work seeks to explain the pattern of development of SSIs in Indonesia within a broader theoretical framework. It also deals with a number of SSI development-related aspects that in Indonesia so far have never or rarely been studied, such as the formation of strategic alliance, cluster development, and application of theories of flexible specialization to the LDCs. The book also tries to examine empirically the effects of the current economic crisis and to assess theoretically the likely impact of the full implementation of the agreed IMF reform package on SSI development in the country. Main problems faced by small producers and the government policy environment are highlighted through several detailed examples.

Asian Development Experience Vol. 2 Yasutani Shimomura 2004-01-19 This volume investigates the missing link, the complicated realities of the relations between governance and development through case studies of ASEAN countries. Its main objective is to explore a theoretical framework to overcoming the limitations of mainstream approaches by employing case studies on decentralization, crisis management, corporate governance and foreign aid

management of both public and private entities. From the beginning of the 1990s onwards, the international aid community has increasingly stressed that good governance, together with democracy and protection of basic human rights, is indispensable for sustainable economic development. The terms, however, are complex, broad, and arguable. They largely refer to discipline of government institutions and the capacity of the public sector. While a wide variety of empirical studies has been done on the relations between good governance and development, it is still unclear how the differences in governance influence development performance in a real world.

Automobile Manufacturers Worldwide Registry

2015-11-17 This one-of-a-kind reference work provides essential data on some 10,700 manufacturers of automobiles, beginning with the earliest vehicle that might be so termed (Frenchman Nicolas Cugnot's steam carriage, in 1770) and covering all nations in which automobiles have been built--67 in all. Not an encyclopedia or collection of histories, this is instead a very complete registry providing essential facts about the manufacturers: complete name, location, years active, type(s) of vehicles built, and other basic data. Compiled during more than 30 years of research, this reference even lists companies that produced just one car. Any builder of passenger-carrying vehicles on at least two but no more than eight wheels, of any design, either mass produced or built as one-off specials, experimental cars, prototypes, or kit cars, is included. Builders of internal combustion, steam and electric powered vehicles are all covered; companies that built only trucks, buses, racing cars, or motorcycles are not included. From A.A.A. to Zzipper and Argentina to Yugoslavia, this is an astonishingly comprehensive resource.
