The Financial War on Crime and Terrorism

Doron Goldbarsht 2026-01-01 The financial crime landscape is rapidly evolving, and so too have government responses over the past decade. This book, a product of the Financial Integrity Hub (FIH), critically examines global vulnerabilities and proposes innovative solutions to combat illicit activities. It addresses the rising sophistication of financial crimes, fuelled by technological advances, globalisation, human fallibility, and regulatory gaps. The book highlights the systemic nature of financial crime, connecting areas such as AML leadership challenges, exploitation of the gaming sector, AI in crime detection, wildlife trafficking financing, and opportunities in public-private and private-private information sharing. It explores how

criminal activity can shift to exploit weaknesses in global systems, from corruption and godfatherism to state capture, underscoring the need for proactivity, along with suitable legal frameworks and enforcement. Chapters explore the ethical dimensions of financial crime, including the role of professional facilitators, and highlight gaps in current legal frameworks, advocating stronger whistleblower protections, transparency in beneficial ownership, and adaptable regulations. Through case studies and analysis, this book equips practitioners, policymakers, and academics with the knowledge to better prevent, detect, and mitigate financial crime, contributing to a more secure, transparent global financial system. It is essential reading for professionals across finance, law enforcement, regulation, and

academia seeking to understand and mitigate financial crime risks. Chapter “Geopolitical of State Capture: Systemic Corruption as a Professional Service” is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

European Yearbook of International Economic Law 2017 Marc Bungenberg 2017-10-06 Volume 8 of the EYIEL focuses on the external economic relations of the European Union as one of the most dynamic political fields in the process of European integration. The first part of this volume analyses the recent controversial questions of the external economic relations of the Union, dealing with the complexity of mixed agreements, transparency and legitimacy issues as well as recent proposals in relation to Investor-State-Dispute Settlement, the Trade Defence Instruments and the implications of the “Brexit” in this context. The second part of EYIEL 8 addresses ongoing bilateral and multilateral negotiations of the EU

with China, Japan, Australia, Canada and Taiwan. Moreover, the third part deals with the EU in international organisations and institutions, in particular the recent institutional aspects of the EU-UN relationship, representation in the IMF as well as WTO jurisprudence involving the EU in 2015. The volume concludes with reviews of recent books in international economic law.

New Regionalism in Australia Mardelene

Grobbelaar 2018-01-18 New Regionalism, promoted as a new paradigm of development by the OECD, suggests that globalization is bringing together new technologies, management, employees and communities to form new patterns of local governance.

However, despite the growing influence of New Regionalism in regional development policy in the West, and increasingly in Australia, there has been little debate about the relevance and application of these ideas in Australia. Bringing

together contributions from academics, practitioners and policy makers, this book redresses this imbalance by examining the theoretical and empirical foundations of this powerful and growing school of thought, locating the debate firmly in the Australian context. With an opening chapter by Kevin Morgan (Cardiff University), who has been at the heart of the New Regionalism debate, the book provides important insights into the theory and practice of New Regionalism in this vibrant region.

Routledge Handbook on Transnational Commercial Law Bruno Zeller 2025-02-21 This handbook, edited by Zeller and Andersen, is an indispensable contribution to the field of transnational commercial law. With an introduction by Sir Roy Goode, this book presents perspectives on legal issues of international sales transactions as perceived by world leading experts, exposing pragmatic and modern aspects of everything from drafting, to

uniform laws, to dispute resolution. The book divides itself between fundamental knowledge of transnational commercial law (e.g. chapters on forum shopping, CISG, Cape Town Convention, etc.) and current and topical developments (e.g. chapters on blockchain, smart contracts, metaverse, digital assets, etc.). International or transnational trade during the past twenty years has become more and more important, outstripping domestic trade as a hallmark of economic success. Model laws developed by the United Nations and other international bodies are now being transplanted or ratified by countries, so a translational element must always be considered as part of any choice of law. Addressing a global audience, as the instruments dealt with herein apply to many states in different regions, this handbook aims not only at an undergraduate and graduate student audience but also will interest professional lawyers.
