Six Canonical Projects by Rem Koolhaas Ingrid Böck
2015-07-31 Rem Koolhaas has been part of the international avant-garde since the nineteen-seventies and has been named the Pritzker Architecture Prize for the year 2000. This book, which builds on six canonical Koolhaas projects, traces the discursive practice behind the design methods used by Koolhaas and his office OMA. It uncovers recurring key themes—such as wall, void, montage, trajectory, infrastructure, and shape—that have structured this design discourse over the span of Koolhaas's oeuvre. The book

moves beyond the six core pieces, as well: It explores how these identified thematic design principles manifest in other works by Koolhaas as both practical re-applications and further elaborations. In addition to Koolhaas's individual genius, these textual and material layers are accounted for shaping the very context of his work's relevance. By comparing the design principles with relevant concepts from the architectural Zeitgeist in which Koolhaas has operated, the study moves beyond its specific subject—Rem Koolhaas—and provides novel insight into the broader history of architectural ideas.

Experimentation and the Autobiographical Search for Identity in the Projects of Michel Leiris and Hubert Fichte Thomas Wilks 2006
This study compares the substantial literary projects of Michel Leiris and Hubert

Fichte, and examines how they overstep theoretical prescriptions in their explorations of the self.

Throughout the book, the author contends that for Leiris and Fichte alike, life and writing become mutually defining over the protracted progressions of their self-scrutiny.

The Art of the Project Johnnie

Gratton 2005-10-01 The idea of

the 'project' crosses generic, disciplinary and cultural

frontiers. At a time when

writers and artists are increasingly describing their

practices as 'projects', remarkably little critical

attention has been paid to the actual idea of the 'project'. This collection of essays responds to an urgent need by suggesting a framework for evaluating the notion of the project in the light of various modernist and postmodernist cultural practices, drawn mainly but not exclusively from the French-speaking domain. The overview offered by this volume promises to make an original and thought-provoking contribution to contemporary literary, artistic and cultural criticism.
