Free Circle equation calculator - Calculate circle's equation using center, radius and diameter step-by-step. If we "multiply out", the center-radius form, we obtain the "general form" of the equation of a circle. Notice that in this form, we can clearly see that the equation of a circle has both x^2 and y^2 terms and ... The standard equation of a circle with center (h,k) and radius r is $(x - h)^2 + (y - k)^2 = r^2$. Given two endpoints of a diameter, we can find the center (midpoint) and radius (half the distance between points). The standard equation of a circle, also called the standard form, is $(x - h)^2 + (y - k)^2 = r^2$. The radius of the circle is r , the center of the circle is (h, k) , and (x, y) is any point on the circle. This standard equation of a circle calculator will help you determine a circle's radius and center coordinates in a blink of an eye. If you are curious about how to find the equation of a circle, scroll ... Calculator can find the center and radius of a circle given its equation or to find equation of a circle given its center and radius. Calculator will generate a step by step explanation. A circle is easy to make: Draw a curve that's radius away from a central point. And so: All points are the same distance from the center. Apr 21, 2026 · This equation states that for any point on the circle, the sum of the squares of the coordinates x and y will equal the square of the radius, ensuring that every point is exactly r units ... Graph functions, plot points, visualize algebraic equations, add sliders, animate graphs, and more. In this article, let's learn about the equation of the circle, its various forms with graphs and solved examples. What is the Equation of Circle? An equation of a circle represents the position of a circle in ...
