Semantic and Conceptual Development Frank C. Keil 1979 In *Semantic and Conceptual Development*, Frank Keil presents the first psychological investigation of the developing child's ontological knowledge. Building on previous philosophical work, Keil shows that ontological categories develop in a highly predictable progression. Moreover, Keil demonstrates that ontological development obeys a strong formal constraint on the relations among categories. Although there are many possible ontological systems, children appear to be inherently targeted to consider a system of only one sort. Keil's results represent exactly the sort of interdisciplinary study of the human mind which is gradually emerging as the new field of cognitive science. We are proud to publish his work as the first book in the *Cognitive Science Series*, which is designed to foster major empirical and theoretical contributions to this new field.

Math Games: Getting to the Core of Conceptual Understanding ebook Ted H. Hull 2013-04-01 Focus on the teaching and learning of mathematics through the use of games. Based on current research and correlated to College and Career Readiness and other state standards, this resource provides both teachers and students with rich opportunities to engage in the Standards for Mathematical Practice. Each concept-building game supports students' learning and understanding concepts. Games are provided in the following categories: Counting and Cardinality; Operations and Algebraic Thinking; Expressions and Equations; Functions; Numbers and Operations in Base Ten; Numbers and Operations--Fractions; The Number System; Ratio and Proportional Relationships; Measurement and Data; Geometry; and Statistics and Probability.

Secondary School Teaching Richard Dean Kellough 1999 Focusing specifically on teaching in grades 7-12, this comprehensive resource guide/workbook involves readers interactively -- through discussions, exercises, vignettes, and case studies -- with the why, what, how, and how well of a performance-based, competency-based, criterion-referenced approach to teaching. Explores instructional planning, strategy implementation, discipline, legal issues, and both student and teacher evaluation. Reflects the latest developments in cognitive learning theory, the constructivist approach to learning, social/interactive learning, the current school funding environment, and the growing diversity of the student population. Emphasizes an eclectic model of teaching which encourages readers to choose effective approaches from a variety of possible teaching models. Connects strategies rather than teaching them as separate entities. For prospective secondary school teachers (grades 7-12).

Explicit Direct Instruction (EDI) John R. Hollingsworth 2017-09-07 A proven approach to better teaching and learning. Explicit Direct Instruction (EDI), an approach based on the premise that all children can learn, helps teachers deliver well-designed, well-taught lessons that significantly improve achievement for all learners. Authors Hollingsworth and Ybarra have refined and extended their highly successful methods in this second edition of their bestselling book. Written in an easy-to-read, entertaining style, this resource provides K-12 teachers with concrete strategies, detailed sample lessons, and scenarios that illustrate what EDI techniques look like in inclusive and diverse classrooms. With chapters covering the individual components of EDI, such as checking for understanding and activating prior knowledge, this updated edition refines the methods so that they are even more effective and easier to implement. Readers will find:

- Strategies for continuous, systematized student engagement
- Expanded corrective feedback strategies
- Clear alignment to the latest content standards
- A new, field-tested strategy for skill development and guided practice
- Expanded information about differentiation and scaffolding

Combining educational theory, brain research, and data analysis, this is a fine-tuned, step-by-step guide to a highly effective teaching method. "Before EDI, our school was a ship adrift at sea with everyone rowing in different directions. EDI has provided us with a framework for instruction and a common language that allowed us to all row in the same direction. Benjamin Luis, Principal Liberty Middle School, Lemoore, CA "EDI makes students accountable. They see now that school is a place to work and learn and play, and they love it. Because even though it is hard, they are doing well." Trudy Cox, School Instructional Coach St. Mary Star of the Sea Catholic School, Carnarvon, Western Australia
