instructions for the AMMPS 5 kilowatt (kW) generator sets, Mobile

Electric Power (MEP)-1030 (50/60 Hertz (Hz)) and MEP-1031 (400 Hz).

This operator's manual provides operating procedures, troubleshooting,

PMCS, maintenance, and supporting information required to operate and

maintain the AMMPS 5 kW generator sets. Listed below are some of the

features included in this TM to help locate and use the provided

information. This TM has been organized using the Work Package (WP)

concept. Each chapter contains a series of WPs rather than sections and

paragraphs. Each WP is designed to stand alone as a complete

information module. If you keep the section(s) of this TM in a loose-leaf

binder, you will be able to remove just the WP needed to complete a

specific task. Each WP is numbered using a four-digit number beginning

with WP 0001. WPs are numbered sequentially throughout the TM (e.g.

WP 0022, WP 0023, etc.). The Table of Contents lists each chapter and

WP title, as well as all figures and tables contained within each WP.

Figures and tables are numbered sequentially within each WP. The WP

number is located at the top right of each page. It is also located at the

bottom of the page with the WP page number included (0001-1 would be

page 1 of the General Information WP (WP 0001, General Information).

Each WP starts on a right-hand page. This is done so you can remove a

single WP from the paper TM if needed for a task. Blank pages are

assigned a number, but it appears on the preceding or following page.

For example, if page 0001-10 of a WP is blank, page 0001-9 will have the

number 0001-9/10 blank; or if page 0001-1 of a WP is blank, page 0001-2

will have the number 0001-1 blank/2. Each WP containing step-by-step

maintenance or troubleshooting procedures will end with the words END

OF TASK, and each WP ends with the statement END OF WORK

PACKAGE. Think of each WP as a small, standalone TM.
