*Video Demystified* Keith Jack 2005 This international bestseller and essential reference is the "bible" for digital video engineers and programmers worldwide. This is by far the most informative analog and digital video reference available, includes the hottest new trends and cutting-edge developments in the field. *Video Demystified, Fourth Edition* is a "one stop" reference guide for the various digital video technologies. The fourth edition is completely updated with all new chapters on MPEG-4, H.264, SDTV/HDTV, ATSC/DVB, and Streaming Video (Video over DSL, Ethernet, etc.), as well as discussions of the latest standards throughout. The accompanying CD-ROM is updated to include a unique set of video test files in the newest formats.

**Audio and Video Engineering Systems** R. G. Gupta 1995

## **Audio/video Professional's Field Manual**

Jerry C. Whitaker 2002 Jam-packed with the latest reference data, device diagrams, standards and terminology, the *Audio Engineer's Field Manual* follows the structure Whitaker established in the *Video and Television Engineer's Field Manual*. There are two basic chapters providing a basic tutorial of the field and a context for the reference material to follow, a massive section (the bulk of the book) given over to pure reference data - organized carefully by topic and usage, a complete audio technology dictionary, and finally an exhaustive listing and referencing of all major standards and protocols.

*Master Handbook of Video Production* Jerry C. Whitaker 2002 This handbook covers the field of video production for digital broadcasting. It offers an overview of the key standardisation

issues and explains the essential topics including editing, special effects and video archiving.

**Video Engineering** Andrew F. Inglis 1993 This text and reference is a complete introduction to video systems--unique because it covers the basics of all important video technologies in one volume. Essential reading for both new engineers entering the field and current engineers who want to stay abreast of recent developments. Table of Contents: Elements of Television Picture Quality; The Scanning Process; Monochrome Video Signals; Color Video Signals; Digital Signal Formats; Video Signal Processing; Signal Transmission and Storage Modes; Laser Technology; Fiber Optic Transmission; FCC Frequency Allocations and Assignments; Microwave Transmission; Satellite Transmission and Distribution; TV Broadcast Transmitting Systems; Cable TV Systems; Television Studio Systems; Television Cameras; Professional TV Recorders; Video Cassette Recorders (VCRs) for the Home; Editing and Production Systems; Television Receivers; System Monitoring and Test Procedures; HDTV and EDTV Systems. 120 illustrations.

## **Deep Learning Applications and Intelligent Decision Making in Engineering**

Senthilnathan, Karthikrajan 2020-10-23 Deep learning includes a subset of machine learning for processing the unsupervised data with artificial neural network functions. The major advantage of deep learning is to process big data analytics for better analysis and self-adaptive algorithms to handle more data. When applied to engineering, deep learning can have a great impact on the decision-making process. *Deep Learning Applications and Intelligent Decision Making in Engineering* is a pivotal reference source that provides practical applications of deep learning to improve decision-making methods and construct smart environments. Highlighting topics such as smart transportation, e-commerce, and cyber physical systems, this book is ideally designed for engineers, computer scientists, programmers, software engineers, research scholars, IT professionals, academicians, and postgraduate

students seeking current research on the implementation of automation and deep learning in various engineering disciplines.
