Wood Design Manual, 1995 1995

Architectural Detailing Patrick Rand 2024-09-02 The industry-standard guide to designing well-performing buildings Aesthetics are a vital part of good design. Great design emerges from a deep understanding of the functionality and constructability of details. Good details provide clear, complete, and correct information to the wide variety of users that need them. Architects guide a project from design idea to buildable reality by working with other building industry professionals and creating a set of details that show how things are put together. Architectural Detailing systematically describes the principles for designing good architectural details. Using patterns that demonstrate best practices and consistent approaches to design detailing, this book teaches why detailing is important, what factors shape detailing issues, and how to detail a building that meets or exceeds performance requirements. Extensive illustrations demonstrate how to design building details that will not leak water or air, will control the flow of heat and water vapor, will adjust to all kinds of movement, and will be easy to construct. This fourth edition has been updated to conform to the latest International Building Codes and International Energy Conservation Code requirements and incorporates current knowledge about new material and construction technology, including: Expanded patterns for sustainability, high performance architecture, and resilience Examples using panelized or modularized prefabricated building assemblies Complex case studies demonstrating the detailing design process for energy efficient structures Design detailing for maintenance and management of sensitive or weak spots in a building assembly Architectural Detailing helps you bring a building together with a well detailed design that communicates effectively at all levels of the construction process. Detailing for Landscape Architects Thomas R. Ryan 2011-02-25

Based upon the best-selling book *Architectural Detailing* by Edward Allen and Patrick Rand, *Landscape Architectural Detailing* applies the same organization to the three major concerns of the landscape architecture detailer—function, constructability, and aesthetics. Richly illustrated, this book approaches landscape architecture detailing in a systematic manner and provides a framework for analyzing existing details and devising new ones. *Landscape Architectural Detailing* includes material on details related to aesthetics, water drainage and movement, structures, construction assemblies, sustainable resources, and more.

National Building Code of Canada, 2010 Canadian Commission on Building and Fire Codes 2010 The NBC sets out technical provisions for the design and construction of new buildings in Canada. It also applies to the alteration, change of use, and demolition of existing buildings. The NBC is available in two volumes and comprises three divisions: A, B and C. Division A includes the compliance options, the objectives, and the functional statements. Division B contains the provisions, referred to as acceptable solutions, relating to such issues as fire protection, occupant safety and accessibility; structural design; environmental separation; heating, ventilating, and air-conditioning; plumbing services; safety measures at construction and demolition sites; and housing and small buildings. Division C contains administrative provisions. Volume 1 contains Divisions A and C along with the attribution tables of Division B. Volume 2 contains Division B, appendices, and index.
