Preserving the World's Great Cities Anthony M. Tung 2001 Both epic and intimate, this is the story of the fight to save the world's architectural and cultural heritage as it is embodied in the extraordinary buildings and urban spaces of the great cities of Asia, the Americas, and Europe. Never before have the complexities and dramas of urban preservation been as keenly documented as in *Preserving the World's Great Cities*. In researching this important work, Anthony Tung traveled throughout the world to visit remarkable buildings and districts in China, Italy, Greece, the U.S., Japan, and elsewhere. Everywhere he found both the devastating legacy of war, economics, and indifference and the accomplishments of people who have worked and sometimes risked their lives to preserve and renew the most meaningful urban expressions of the human spirit. From Singapore's blind rush to become the most modern city of the East to Warsaw's poignant and heroic effort to resurrect itself from the Nazis' systematic campaign of physical and cultural obliteration, from New York and Rome to Kyoto and Cairo, we see the city as an expression of the best and worst within us. This is essential reading for fans of Jane Jacobs and Witold Rybczynski and everyone who is concerned about urban preservation. From the Hardcover edition.

Local Government Law Gerald E. Frug 2001
The Planning Imagination Mark Tewdwr-Jones 2013-10-01 Knighted in 1998 'for services to the Town and Country Planning Association', and in 2003 named by Her Majesty Queen Elizabeth II as a 'Pioneer in the Life of the Nation', Peter Hall is internationally renowned for the breadth and depth of his studies and writings on urban and regional planning. For the last 50 years, he has captured and helped to create the 'planning imagination'. Here the editors have brought together in five themes a series of critical reflections on Peter's vast and diverse contributions. Those reflections are provided by colleagues familiar with his work. The five parts are devoted to Peter Hall's breadth of academic work, covering the history of cities and planning, London, spatial planning, connectivity and mobility, and urban globalization. Finally, as a sixth part, the editors have asked Peter Hall himself to reflect on his career and the sources of his imagination. The story this book tells is not one of a singular, totally consistent theoretical and philosophical view elaborated over several decades. Rather it covers a set of views that necessarily admits signs of Peter's inconsistency and imperfection over the years - the insights and imperfections that inevitably accompany the exercise of a nonetheless remarkably fertile, restless and inspiring planning imagination.

The City Builders Susan S. Fainstein 2001 This revised edition examines major redevelopment efforts in New York and London to uncover the forces behind these investment cycles and the role that public policy can play in moderating market instability. It chronicles the progress of three development projects in New York and three in London.

Cities in a World Economy Saskia Sassen 2006-04-11 The Third Edition of the international bestselling *Cities in a World Economy* presents sociologists with a new perspective on the study of urban sociology. The decentralization and privatization of the world's economies has radically altered such things as the organization of labour, the structure of consumption and the distribution of earnings in ways that have yet to be fully realized. In a world economy that is truly more global than it has ever been, Saskia Sassen addresses the need to account for the global economies increasing influence on the social structures of cities.

Cities of Tomorrow Peter Hall 1997-02-18 *Cities of Tomorrow* is a critical history of planning in theory and practice in the twentieth century, as well as of the social and economic problems and opportunities that gave rise to it.
