Natural Resource Economics Barry C. Field 2015-12-10 Decisions about the conservation and use of natural resources are made every day by individuals, communities, and nations. The latest edition of Field's acclaimed text highlights the incentives and trade-offs embedded in such decisions, providing a lucid introduction to natural resource issues using the analytical framework of economics. Employing a logical structure and easy-to-understand descriptions, Field covers fundamental economic principles and their general application to natural resource use. These principles are further developed in chapters devoted to specific resources. Moreover, this up-to-date volume addresses the challenge of achieving socially beneficial utilization rates in the twenty-first century amid continuing population growth, urbanization, and global climate change. Topics new to the Third Edition include:

- implications of climate change on resources
- fracking
- energy intensity and the energy efficiency gap
- reducing fossil energy
- forests and carbon
- international water issues
- globalization and trade in natural resources

The Geoeconomics of the International Monetary Order Jose Carrillo-Pina

2025-10-01 This edited volume explores the intricate and multifaceted transformation of the global financial and monetary order, scrutinizing it from multiple perspectives. It also explores the prospects of the post-COVID and post-war international monetary system, shaped by the

transformative influence of advanced technologies. Money is not just about wealth; it has historically operated as an impersonal force, necessitating a long-range, multidisciplinary understanding that encompasses economic, political, strategic, technological, geographical, and societal factors. In today's world, there is an intensifying competition to redefine the international financial and monetary order. National states are aware of the monetary dimension as a domain with implications for international relations, national security, foreign policy, grand strategy, and intelligence. The supremacy of the dollar is being challenged by unsustainable debts, rampant quantitative easing, and the impact of sanctions. Revisionist states view the dollar as a cornerstone of US national power and are furthering a global de-dollarization campaign. China, as a rising economic power, is bolstering the internationalization of the renminbi, while Russia and Iran are developing alternatives to bypass the dollar-centric international monetary and financial systems. This emerging zeitgeist of monetary and financial pluralism is reflected in trends like the accumulation of physical gold, the evolution of financial warfare, the rise of digital FinTech platforms, and the proliferation of virtual currencies—including decentralized cryptocurrencies, corporate supranational stablecoins, and Central Bank Digital Currencies. Additionally, there is the establishment of parallel international financial institutions not controlled by Western powers, the development of multilateral or regional currencies, and the use of unconventional assets to mitigate the impact of Western sanctions. Do these developments herald a new international financial and monetary order? This book aims to study rising trends, disruptive phenomena, and potential game-changers from multiple perspectives to provide greater clarity.

International Handbook on Teaching and Learning Economics Gail

Mitchell Hoyt 2012 The International Handbook on Teaching and

Learning Economics is a power packed resource for anyone interested in investing time into the effective improvement of their personal teaching methods, and for those who desire to teach students how to think like an economist. It sets guidelines for the successful integration of economics into a wide variety of traditional and non-traditional settings in college and graduate courses with some attention paid to primary and secondary classrooms. . . The International Handbook on Teaching and Learning Economics is highly recommended for all economics instructors and individuals supporting economic education in courses in and outside of the major. This Handbook provides a multitude of rich resources that make it easy for new and veteran instructors to improve their instruction in ways promising to excite an increasing number of students about learning economics. This Handbook should be on every instructor's desk and referenced regularly. ð Tawni Hunt Ferrarini, *The American Economist* ð In delightfully readable short chapters by leaders in the sub-fields who are also committed teachers, this encyclopedia of how and what in teaching economics covers everything. There is nothing else like it, and it should be required reading for anyone starting a teaching career ð and for anyone who has been teaching for fewer than 50 years! ð Daniel S. Hamermesh, University of Texas, Austin, US The

International Handbook on Teaching and Learning Economics provides a comprehensive resource for instructors and researchers in economics, both new and experienced. This wide-ranging collection is designed to enhance student learning by helping economic educators learn more about course content, pedagogic techniques, and the scholarship of the teaching enterprise. The internationally renowned contributors present an exhaustive compilation of accessible insights into major research in economic education across a wide range of topic areas including: ¥ Pedagogic practice ð teaching techniques, technology use, assessment, contextual techniques, and K-12 practices. ¥ Research findings ð principles courses, measurement, factors influencing student performance, evaluation, and the scholarship of teaching and learning. ¥ Institutional/administrative issues ð faculty development, the undergraduate and graduate student, and international perspectives. ¥ Teaching enhancement initiatives ð foundations, organizations, and workshops. Grounded in research, and covering past and present knowledge as well as future challenges, this detailed compendium of economics education will prove an invaluable reference tool for all involved in the teaching of economics: graduate students, new teachers, lecturers, faculty, researchers, chairs, deans and directors.
