*Beyond Assessment of Quality of Life in*

*Schizophrenia* A. George Awad 2016-06-14 This

book fills a significant research gap in how to integrate quality of life data into relevant clinical care plans, and to broaden its applicability to pharmaco-economic studies of antipsychotic medications and health policy decision-making. It also presents an argument for reformulating the concept of health-related quality of life in schizophrenia as a bio-psycho-social construct, which provides an opportunity to better explore the many factors underpinning the concept itself. Internationally renowned experts from different scientific backgrounds and scopes of expertise each make arguments for the need to invigorate quality of life as a concept in schizophrenia, by broadening its usefulness for clinical and research efforts. The book represents an important addition to the extensive contributions of its editors, Dr. A. George Awad and Dr. Lakshmi N.P. Voruganti, to the field of quality of life.

Liangchi Zhang 2011-11-25 This is the

proceedings of the selected papers presented at 2011 International Conference on Engineering Education and Management (ICEEM2011) held in Guangzhou, China, during November 18-20, 2011. ICEEM2011 is one of the most important conferences in the field of Engineering Education and Management and is co-organized by Guangzhou University, The University of New South Wales, Zhejiang University and Xi'an Jiaotong University. The conference aims to provide a high-level international forum for scientists, engineers, and students to present their new advances and research results in the field of Engineering Education and

Management. This volume comprises 122 papers selected from over 400 papers originally submitted by universities and industrial concerns all over the world. The papers specifically cover the topics of Management Science and Engineering, Engineering Education and Training, Project/Engineering Management, and Other related topics. All of the papers were peer-reviewed by selected experts. The papers have been selected for this volume because of their quality and their relevancy to the topic. This volume will provide readers with a broad overview of the latest advances in the field of Engineering Education and Management. It will also constitute a valuable reference work for researchers in the fields of Engineering Education and Management.

*Electronic Technology and Civil Procedure*  
 Miklós Kengyel 2012-06-26 The effect of modern and communication technology on civil procedure first appeared on the agenda of the conference organized by the International Association of Procedural Law in 1999, verifying Lord Woolf's statement from the 90's, that "IT will not only assist in streamlining and improving our existing systems and process; it is also likely, in due course, itself to be catalyst for radical change as well...". At the conference in Pecs in the autumn of 2010 participants from three continents and twenty-five countries examined all aspects of the impact of modern information technology on civil procedure beginning with the electronic submission of the application, ranging from electronic service of documents and electronic means of proof supported by modern information technology. In addition to the practical issues they discussed the possible impact of electronic procedures on traditional principles of civil procedure. The conference book contains seven main reports and eleven correferates, the foreword was written by Prof. Peter Gottwald, the President of

the International Association of Procedural Law.  
**Electrical Technology** Uday A. Bakshi  
 2020-11-01 The book covers all the aspects of Electrical Technology for undergraduate course. Various concepts of electrical engineering like power and energy measurement, tariff and power factor improvement, illumination, single phase and three phase transformers, single phase and three phase induction motors, alternators, d.c. machines, special purpose motors and solid state speed control of d.c. and a.c. drives are explained in the book with the help of comprehensive approach. The book starts with review of basic concepts of electrical engineering. Then it explains electrical power measurement methods and electrical energy measurement methods. The book also explains types of tariffs and power factor improvement methods. It includes all the details of illumination schemes. The book further explains single phase and three phase transformers. Then book provides the detailed discussion of three phase and single phase induction motors, d.c. generators and motors and synchronous generators. The discussion of special purpose motors such as servomotors, stepper motors and universal motor is also provided in support. Finally, the book incorporates the discussion of various power devices such as power diodes, SCR, DIAC, Triac, IGBT, Power MOSFETs and then continues to discuss the solid state speed control methods for d.c. and a.c. electrical drives. The book uses plain, simple and lucid language to explain each topic. The book provides the logical method of explaining the various complicated topics and stepwise methods to make the understanding easy. The variety of solved examples is the feature of this book. The book explains the philosophy of the subject which makes the understanding of the concepts very clear and makes the subject more interesting.
