**Derecho internacional a través de casos** Abello-Galvis, Ricardo 2023-09-30 Para el grupo de investigación en Derecho Internacional de la Facultad de Jurisprudencia de la Universidad del Rosario y los editores de este libro, es un gusto presentar a la comunidad académica esta nueva obra que recoge los mejores trabajos presentados en el IV Congreso de Derecho Internacional, realizado en abril del 2022, el cual contó con la participación de conferencistas del más alto nivel representando 14 nacionalidades. Los mejores escritos de investigación del llamado a contribuciones fueron seleccionados para la presente obra, sometida a evaluación de pares y que refleja el diálogo y desarrollo temático del Congreso. La primera sección del libro está dedicada al derecho internacional público visto desde las decisiones judiciales de tribunales internacionales y las organizaciones internacionales. La segunda se centra en el derecho internacional de los derechos humanos, la salud y el medio ambiente. La tercera sección incluye capítulos relativos al derecho internacional penal y el derecho internacional humanitario. La cuarta, y última, reúne contribuciones en derecho internacional económico y privado. **Leadership and Organizational Sustainability** Elia Socorro Díaz Nieto 2023-06-27 The book presents a new type of leadership focused on sustainable human development and organizational sustainability, which is based on the self-realization of the person of the leader, which means the satisfaction of their needs, according to the scale of Abraham Maslow, through integral human development in all aspects of life. Because the term "leader" appears to refer to anyone with the authority to confer a position with subordinates, the reality within organizations has shown that a leader must go further and demonstrate commitment, awareness, and concern for the common good. Which person has these characteristics? People who have had more opportunity to develop in different areas of their being, resulting in them being conceived as more educated. The qualities in a person are the basis of leadership. Education and practice are much more important than all hereditary and genetic codes. This volume explores the various ways of making explicit the dimensions of social, economic, and environmental sustainability through knowledge management that addresses the identification, collection, processing, circulation, use, exchange, and preservation of knowledge within operating systems and the context of organizations, considering issues that contribute to sustainability - human and organizational - where the leader is the main actor and the means is knowledge management.
