A Guide to Careers in Physical Anthropology

Alan S. Ryan 2001-12-30 The field of physical anthropology deals with issues that everyone thinks about and cares about: our origins, our evolutionary history, and why we look and act the way we do. The field has benefited greatly by increased attention from the media, from

popular books, and from several television series. There is a multitude of topics considered by physical anthropologists, including human and primate origins, primate societies, growth and development, genetics, forensic science, and nutrition. Most physical anthropology graduate students have traditionally aspired to research and/or teaching careers at a university. However, during the last decade there has been an increased interest in non-traditional careers outside the ivory tower, primarily because the number of new physical anthropology Ph.D.s exceeds the number of jobs available in anthropology departments. Because physical anthropology encompasses a variety of research interests, students are broadly trained and have a wealth of talents and skills that make them competitive for non-academic careers. However,

pursuing opportunities outside the academy requires thoughtful planning and training. This collection serves as a reference for students contemplating a career in physical anthropology within or outside the academy. Several rewarding career paths that physical anthropologists have chosen are described. Students will understand how anthropological theory, methods, and training are applicable to job responsibilities and career development. This book will also help departments of anthropology design coursework and training programs that will make their students more competitive. In sum, the future of anthropology seems promising given the discipline's broad scope and concern for issues faced by contemporary society, and physical anthropologists will be playing an increased role in many arenas.

Color Struck Julius O. Adekunle 2010-02-24
Color Struck: Essays of Race and Ethnicity in Global Perspective is a compilation of expositions on race and ethnicity, written from multiple disciplinary approaches including history, sociology, women's studies, and anthropology. This book is organized around a topical, chronological framework and is divided into three sections, beginning with the earliest times to the contemporary world. The term "race" has nearly become synonymous with the word "ethnicity," given the most recent findings in the study of human genetics that have led to the mapping of human DNA. *Color Struck* attempts to answer questions and provide scholarly insight into issues related to race and

ethnicity.

The Essential Max Müller J. Stone 2016-04-30
Max Müller is often referred to as the 'father of Religious Studies', having himself coined the term 'science of religion' (or religionswissenschaft) in 1873. It was he who encouraged the comparative study of myth and ritual, and it was he who introduced the oft-quoted dictum: 'He who knows one [religion], knows none'. Though a German-born and German-educated philologist, he spent the greater part of his career at Oxford, becoming one of the most famous of the Victorian arm-chair scholars. Müller wrote extensively on Indian philosophy and Vedic religion, translated major sections of the Vedas, the Upanisads, and all of the Dhammapada, yet never visited India. To be sure, his work bears the stamp of late Nineteenth-Century sensibilities, but as artifacts

of Victorian era scholarship, Müller's essays are helpful in reconstructing and comprehending the intellectual concerns of this highly enlightened though highly imperialistic age.

Our Origins Clark Spencer Larsen 2014-02-01
