Sustainable Education and Development – Sustainable Industrialization and Innovation Clinton Aigbavboa 2023-02-17 This book presents papers from the 11th Sustainable Education and Development Research

Conference on the theme: "Build Resilient Infrastructure, Promote Inclusive and Sustainable Industrialization, and Foster Innovation." Papers related to the sub-themes were presented: i. Develop quality, reliable, sustainable, and resilient infrastructure, including regional and transborder infrastructure, to support economic development and human well-being, with a focus on affordable and equitable access for all. ii. Promote inclusive and sustainable industrialization and, by 2030, significantly raise industry's share of employment and gross domestic product, in line with national circumstances, and double its share in the least developed countries. iii. Increase the access of small-scale industrial and other enterprises, in particular in developing countries, to financial services, including affordable credit, and their integration into value chains and markets. iv. By 2030, upgrade infrastructure and retrofit industries to make them sustainable, with increased resource-use efficiency and greater adoption of clean and environmentally sound technologies and industrial processes, with all countries taking action in accordance with their respective capabilities. v. Enhance scientific research and upgrade the technological capabilities of industrial sectors in all countries, in particular developing countries, including, by 2030, encouraging innovation and substantially increasing productivity. SEDRC gathers papers that explain how key education on the Sustainable Development Goals is transforming lives, eradicating poverty, professing solutions to the infrastructural deficit in Africa, and providing innovative ways to provide affordable housing in Africa. This book will be of interest to academics, postgraduate students, and industry professionals.

Construction Project Monitoring and Evaluation Callistus Tengan 2021-04-26 This book will provide readers with an in-depth theoretical awareness and practical guidance on the implementation of an effective monitoring and evaluation (M&E) system to ensure construction projects meet approved quality, cost, time and social sustainability objectives. The authors discuss the drivers, challenges, determinants and benefits of effective M&E implementation together with the theories and models underpinning construction project M&E practices. Further, a comparative overview of M&E practices in developed and developing countries is presented to elucidate the best practices. The book first conceptualizes M&E as a five-factor model comprising stakeholder involvement, budgetary allocation and logistics, technical capacity and training, leadership, and communication. It then presents an M&E case study on the Ghanaian construction industry before expanding on the idea of M&E systems as an effective tool for project performance and in optimizing a project's contribution to society and the environment. The book further provides guidance on M&E practice for construction project managers, investors, professionals, researchers and other stakeholders and is therefore of interest to those in architecture, construction engineering, planning, project management and development studies.

Proceedings of the UPY-ICCCM International Conference on Education and Social Science (UPINCESS 2024) Ari Kusuma Wardana 2024-12-29

This is an open access book. In recent decades, the world has witnessed various global crises that include climate change, pandemics, social inequality, economic instability and conflict. These crises not only pose great challenges to governments and the private sector, but also to the global community as a whole. This situation calls for a comprehensive and multidisciplinary approach to find sustainable solutions. Education plays a central role in equipping young people with the knowledge, skills and values needed to address these global challenges. Through inclusive and quality education, individuals can be developed into innovative and responsible leaders, ready to contribute to their society and environment. Education also plays an important role in raising awareness about global issues and promoting international co-operation. On the other hand, social sciences offer critical insights into the social, economic and political dynamics underlying the global crisis. Research in the social sciences can uncover the root causes of inequality, conflict and environmental degradation, and identify effective interventions to address these problems. Social science also helps in understanding how public policies can be designed and implemented to support sustainable development and community well-being. With this background, The UPY - ICCCM International Conference on Education and Social Science (UPINCESS) 2024 was held to bring together academics, researchers, practitioners, and policy makers from various countries to discuss, share knowledge, and collaborate in finding solutions to the global crises we face today. Thus, this conference is expected to make a real contribution in building a more just, prosperous, and sustainable world through education and social science.
