Foundations of Muslim Images and Treatment of the World Beyond Islam Malek Muhammad Towghi 1991
Essential Islam Diane Morgan 2009-11-12 An introductory guide to the important elements of the world's largest religion, including the Quran, the Pillars of Faith, and the life of Muhammad, as well as Islamic history, customs and rituals, and contributions to world culture. Essential Islam: A Comprehensive Guide to Belief and Practice is the ideal beginner's resource on the core elements of a faith that, like Christianity and Judaism, offers a guide to holy living and a path to salvation—one that like other world faiths has inspired peace and war, tolerance and brutality, enlightenment and abysmal ignorance. Essential Islam offers an insightful, objective look at Islam from its inception to the present day, including a discussion of Islamic beliefs about God, history, warfare, marriage, the afterlife, and the relationship between Islam and other faiths. It is a rich source for dispelling misconceptions—for example, only 10 percent of Muslims are Arabic, and only a quarter of those reside in the Middle East—and for understanding tensions between groups within and outside Islam. More importantly, it gives readers a portrait of Islam not as a religion of extremists, but as a dynamic living faith practiced by people of all kinds in virtually every corner of the world.

Islam Neal Robinson 2013-11-05 This user-friendly reference work provides an accessible introduction to Islam for the general reader and student alike. It presents a historical overview, a description of Islam as a living faith along with a discussion of the problems raised by Western perceptions of Islam. Including key dates and simple definitions, the book provides readers with explanations of technical matters such as the structure of Arabic names and the various ways of transliterating Arabic.

The Oxford Dictionary of Islam John L. Esposito 2003-05-15 Designed for general readers with little or no knowledge of Islam, this dictionary provides more than 2000 entries organized in an easy-to-use, A-Z format. Entries cover major political movements, landmarks and events, and include terms from Islamic law and biographical profiles.

Islam and The English Enlightenment Zulfiqar Ali Shah 2022-06-02 “Never before to my knowledge has the cross-fertilisation of Western and Islamic ideas been so encyclopedically documented as it is here. In reading Islam and the English Enlightenment, you will never see the relationship between Islam and the West in the same way again.” ROBERT F. SHEDI NGER Professor of Religion, Luther College “Dr. Zulfiqar Ali Shah’s Islam and the English Enlightenment is one of the most profoundly enlightening books I have read in years. Dr. Shah compellingly demonstrates that the thinkers of English Enlightenment were undeniably indebted to Islamic sciences and thought, and that the foundational principles of rationalist thought, scientific inquiry and religious toleration were deeply anchored in the Islamic tradition.” KHALED ABOU EL FADL Omar & Azmeralda Alfi Distinguished Professor of Law, UCLA School of Law “This is a book that anyone interested in stepping outside a Eurocentric view of the rise of the West and of the modern age must read.” MICHAEL A. GILLESPIE Professor of Political Science & Philosophy, Duke University “Dr. Shah convincingly demonstrates the central role that Islam played in shaping the values and ideas of the Enlightenment reformers such as John Locke and Isaac Newton who had helped to produce the modern world.” GERALD MACLEAN Emeritus Professor, University of Exeter

A History of Conversion to Islam in the United States, Volume 2 Patrick D. Bowen 2017-09-11 In A History of Conversion to Islam in the United States, Volume 2: The African American Islamic Renaissance, 1920-1975 Patrick D. Bowen offers an in-depth account of African American Islam as it developed in the United States during the fifty-five years that followed World War I. Having been shaped by a wide variety of intellectual and social influences, the ‘African American Islamic Renaissance’ appears here as a movement

that was characterized by both great complexity and diversity. Drawing from a wide variety of sources—including dozens of FBI files, rare books and periodicals, little-known archives and interviews, and even folktale collections—Patrick D. Bowen disentangles the myriad social and religious factors that produced this unprecedented period of religious transformation.

Islam Revealed Anis Shorrosh 1988 Thumb through any newspaper, listen to any newscast, and the terms "Islamic Al Jihad" or "Shi'ite Muslims" will inevitably be linked with bombings, hijackings, and other terrorist acts. What do you know about this religion that boasts "the greatest joy is to kill and be killed for Allah"? In Islam Revealed, Dr. Anis Shorrosh explains the driving force behind the fanatical, as well as the moderate and conservative sects of Islam. Drawing on his experience as a Palestinian-born Arab Christian and years of research and study, Dr. Shorrosh takes a hard look at an ever-growing religion that currently numbers 900 million members. Through comparisons of Islam's Quran and the Hebrew-Christian Bible, Dr. Shorrosh outlines the contradictions and inaccuracies that form the basis for the Muslims' beliefs, and contrasts the turbulent life of Muhammad with the life of Jesus. In light of recent terrorist activities in America and the continuing tensions in the Middle East, Islam Revealed is a timely reference to the belief system of one in five people on earth.

Science Under Islam Sayyed M. Deen 2007 The book describes the rise of science (and technology) in the Islamic Golden Age, examines the causes that led to its decline, reviews failed later attempts for its revival and finally discusses social and religious reformation needed for it to flourish in contemporary Muslim societies. Social reformation covers rule of law, democratic infra-structure and human-rights, while religious reformation involves the reinterpretation of scripture. It is argued that without such a social and religious reformation, Muslims (a quarter of the earth's population) will be less able to participate in the science-driven 21st century world. Note that Muslim leaders in the UK and elsewhere are not addressing the need of such an essential reformation, without which, Muslims as a people will remain in a limbo and thus continue to be vulnerable to extremist ideas. Therefore this book should be a must for all those interested in the creation of a harmonious one-world. Look at www.scienceunderislam.com for more information.
