Secret Language Barry J. Blake 2010-03-25

This book is about language that is designed to mean what it does not seem to mean. Ciphers and codes conceal messages and protect secrets. Symbol and magic hide meanings to delight or imperil. Languages made to baffle and confuse let insiders talk openly without being understood by those beyond the circle. Barry Blake looks at these and many more. He explores the history and uses of the slangs and argots of schools and trades. He traces the centuries-old cants used by sailors and criminals in Britain, among them Polari, the mix of Italian, Yiddish, and slang once spoken among strolling players and circus folk and taken up by gays in the twentieth century. He examines the sacred languages of ancient cults and religions, uncovers the workings of

onomancy, spells, and gematria, looks into the obliqueness of allusion and parody, and celebrates the absurdities of euphemism and jargon. Secret Language takes the reader on fascinating excursions down obscure byways of language, ranging across time and culture. With revelations on every page it will entertain anyone with an urge to know more about the most arcane and curious uses of language.

Media Models to Foster Collective Human Coherence in the PSYCHecology Schafer, Stephen Brock 2019-06-14 Modern populations

are superficially aware of media potentials and paraphernalia, but recent events have emphasized the general ignorance of the sentient media. Advertising has long been suspected of cognitive manipulation, but emergent issues of political hacking, false news, disinformation campaigns, lies, neuromarketing, misuse of social media, pervasive surveillance, and cyber warfare are presently challenging the world as we know it. Media Models to Foster Collective Human Coherence in the PSYCHecology is an assemblage of pioneering research on the methods and applications of video games designed as a new genre of dream analogs. Highlighting topics including virtual reality, personality profiling, and dream structure, this book is ideally designed for professionals, researchers, academicians, psychologists, psychiatrists, sociologists, media specialists, game designers, and students hoping for the creation of sustainable social patterns in the emergent reality of energy and information.

The Secret Language of Destiny Gary Goldschneider 2003-10-20 This indispensable astrological text addresses the question we all ask at some point during the course of our lives: "What is the purpose of my life?" It identifies, based on birthdate, what, on a soul level, someone came into this lifetime to achieve, in other words, their karmic signature. Gary Goldschneider and Joost Elffers take the reader on a spiritual quest around the astrological galaxy that culminates in a sense of purpose and truth. In addition to the great inter-personal benefits, this book also contains thousands of tidbits of information regarding the astrological signs of actors, musicians, and world leaders.

Transformative Education for Regeneration and Wellbeing Janet J. McIntyre-Mills 2022-09-29 The edited volume advocates for teaching systemic ethics as a form of life-long learning within nature's classroom to support social and environmental justice. This book also explains critical systemic thinking as both an individual and a collective responsibility through many ways of knowing spanning the arts and sciences to inspire creativity. This volume contributes to theory and practice by making suggestions as to how to re-frame the content, structure and process of education for transformation. This volume makes a case for a more relational understanding of human beings and other species. This volume also explores a more integrated curriculum where learners are given the opportunity to explore many ways of knowing and learning to earn, learn and grow a future through circular economies, co-operatives

and learning communities. This book highlights how the models of sustainable development focus on education for wellbeing in line with the UNESCO approach outlined in 2021 that emphasizes the systemic nature of education rooted in protecting the environment and supported by the participation of active global citizens. This volume demonstrates transformation of our thinking and practice is overdue and calls for changing the narrative through our standing together and redesigning systems of education to prioritize a more holistic worldview that embraces the planet and living systems. The focus of this volume is on values, perspectives and ways to make a difference through addressing a range of practical concerns, such as: food, energy and water security. Ontologically the editors' perspective is shaped by recognising kinship with nature, as expressed by Indigenous custodians. Epistemologically the editors and contributors to this volume explore ways to enhance education

based on working across cultures and disciplines using a cross cultural approach and mixed methodology. Axiologically the editors support the notion of transformative research that promotes balancing non-anthropocentrism with an approach that draws on Indigenous wisdom whilst addressing patriarchal notions through gender mainstreaming.

Paid, Owned, Earned Nick Burcher 2012-03-03
The complexity of media that now sees multiple channels accessed through multiple devices has created major challenges for today's marketing and advertising professionals. Consumer time is split between TVs, laptops, iPads, X-Boxes and smartphones, with traditional media, websites, videos, social networks and apps all competing for attention, meaning it's difficult for brands to decide how best to reach and engage their audiences. Paid, Owned, Earned defines the

constituents of each area of 'paid', 'owned' and 'earned' media and shows how they are linked together. It proposes a blueprint for how to think and navigate across this space using a framework made up of key elements such as communities and content, social media optimisation, seeding and viral distribution, broadcast mass media, social performance media and measurement.

The Weeping Time Anne C. Bailey 2017-10-09

In 1859, at the largest recorded slave auction in American history, over 400 men, women, and children were sold by the Butler Plantation

estates. This book is one of the first to analyze the operation of this auction and trace the lives of slaves before, during, and after their sale. Immersing herself in the personal papers of the Butlers, accounts from journalists that witnessed the auction, genealogical records, and oral histories, Anne C. Bailey weaves together a narrative that brings the auction to life. Demonstrating the resilience of African American families, she includes interviews from the living descendants of slaves sold on the auction block, showing how the memories of slavery have shaped people's lives today. Using the auction as the focal point, *The Weeping Time* is a compelling and nuanced narrative of one of the most pivotal eras in American history, and how its legacy persists today.
