The Politics of English as a World Language Christian Mair 2003

The complex politics of English as a world language provides the backdrop both for linguistic studies of varieties of English around the world and for postcolonial literary criticism. The present volume offers contributions from linguists and literary scholars that explore this common ground in a spirit of open interdisciplinary dialogue. Leading authorities assess the state of the art to suggest directions for further research, with substantial case studies ranging over a wide variety of topics - from the legitimacy of language norms of lingua franca communication to the recognition of newer post-colonial varieties of English in the online OED. Four regional sections treat the Caribbean (including the diaspora), Africa, the Indian subcontinent, and Australasia and the Pacific Rim. Each section maintains a careful balance between linguistics and literature, and external and indigenous perspectives on issues. The book is the most balanced, complete and up-to-date treatment of the topic to date.

Teaching English as a Second Language John Ambrose Bright 1970

Progressives, Patterns, Pedagogy Ute Römer 2005-01-01 This book presents a large-scale corpus-driven study of progressives in 'real' English and 'school' English, combining an analysis of general linguistic interest with a pedagogically motivated one. A systematic comparative analysis of more than 10,000 progressive forms taken from the largest existing corpora of spoken British English and from a small corpus of EFL textbook texts highlights numerous differences between actual language use and textbook language concerning the distribution of progressives, their preferred contexts, favoured functions, and typical lexical-grammatical patterns. On the basis of these differences, a number of pedagogical implications are derived, the integration of which then leads to a first draft of an innovative concept of teaching progressives - a

concept which responds to three key criteria in pedagogical description: typicality, authenticity, and communicative utility. The analysis also demonstrates that many existing accounts of the progressive are inappropriate in several respects and that not enough attention is being paid to lexical-grammatical relations. Winner of the "Wissenschaftspreis Hannover 2006" for outstanding research monographs !

English Computer Corpora Stig Johansson 2011-08-25 The future of English linguistics as envisaged by the editors of Topics in English Linguistics lies in empirical studies which integrate work in English linguistics into general and theoretical linguistics on the one hand, and comparative linguistics on the other. The TiEL series features volumes that present interesting new data and analyses, and above all fresh approaches that contribute to the overall aim of the series, which is to further outstanding research in English linguistics.

A University Grammar of English Randolph Quirk 1973
The Syntax, Semantics and Derivation of Bare Nominalisations in English Bożena Cetnarowska 1993

A Comprehensive Grammar of the English Language Randolph Quirk 1985 From the time when we started collaborating as a team in the 1960s, we envisaged not a grammar but a series of grammars. In 1972, there appeared the first volume in this series, *A Grammar of Contemporary English (GCE)*. This was followed soon afterwards by two shorter works, *A Communicative Grammar of English (CGE)* and *A University Grammar of English (UGE)*, published in the United States with the title *A Concise Grammar of Contemporary English*. With *A Comprehensive Grammar of the English Language*, we attempt something much more ambitious: a culmination of our joint work, which results in a grammar that is considerably larger and richer than GCE and hence superordinate to it. Yet, as with our other volumes since GCE, it is also a grammar that incorporates our own further research on grammatical structure as well as the research of scholars worldwide who have contributed to the description of English and to developments in linguistic theory. - Preface.
