Britten, Opera and Film Peter Auker 2025-01-14 Investigates cinematic qualities in opera and reveals why Benjamin Britten's operas lend themselves to TV and film interpretations. Benjamin Britten's 1954 opera *The Turn of the Screw*, based on Henry James's ghost story, has been described by many critics and commentators as cinematic. Along with Peter Grimes, *The Turn of the Screw* is one of the most frequently televised or filmed of Britten's operas. Some of these productions have used location footage and/or studio work, and others are based on theatrical settings. This book explores the notion of cinematic opera in the context of *The Turn of the Screw* and filmed opera in general, and questions what inherent cinematic qualities exist in the work which make it particularly conducive for screen interpretation, an aspect of Britten's compositional style which has rarely been examined in detail before. Contrary to the prevailing narrative around Britten's disdain for cinema and television, the composer engaged with film as both a cinemagoer and film music composer early in his career and these experiences informed his compositional and dramatic choices. Archival research reveals clues to the composer's adaptation process. By tracing the progress from Henry James's original novella to operatic stage and screen production, via the development of Myfanwy Piper's libretto and Britten's score, the journey of adaptation is discussed in detail. A key part of the book looks at the subsequent interpretation of the opera on screen. Case studies evaluate eight directors' interpretations of the opera ranging from 1959 up to the 2020s. Included is a special study of Peter Morley's 1959 ITV version, which had previously been thought lost. This reveals the roots of Britten's subsequent engagement with screen media, culminating in his television opera *Owen Wingrave*. The book also briefly explores the influence of cinema on stage productions of the opera which have not been filmed.

The Architecture and Geography of Sound Studios Even Smith

Wergeland 2024-06-21 This is a book about sound studios, focusing on their architectural and geographical aspects. It explores how music is materialized under specific spatial and technological conditions and the myths associated with this process. Through ten in-depth studies, it examines the design, evolution and current function of sound studios amidst economic and technological shifts in the music industry. Traditional studios are in flux between the past and future. The industry, while steeped in romanticism and nostalgia, also embraces forward-driven pragmatism and an extensive reuse culture, encompassing heritage audio, building materials and existing buildings. A surprisingly diverse architectural heritage, the most significant feature is the host building, the framework around the studio capsule. Many traditional studios adapt to digitalization with hybrid solutions, reflecting a shift toward smaller, more versatile spaces. In a time when recordings in theory can happen anywhere, destination studios must excel to attract clients, balancing historical legacies with diversification. Although they may be easy to deconstruct, many of the myths endure, sustaining ideas of landmark recordings, unique locations and distinct remnants of sonic heritage. Courtesy of their capacity to keep the past alive in the present, traditional sound studios are best described as museums that work. This book aims to reach scholars and students with an interest in history, theory and preservation, as well as practicing architects and architectural students who wish to find out more about the relationship between sound and space, acoustic design and retrofitting of historical buildings into specialized functions. It also aims to reach practicing musicians, producers, music students and music scholars.

Theater of the Mind Neil Verma 2024-05-31 For generations, fans and critics have characterized classic American radio drama as a "theater of the mind." This book unpacks that characterization by recasting the radio play as an aesthetic object within its unique historical context. In *Theater of the Mind*, Neil Verma applies an array of critical methods to more than six thousand recordings to produce a vivid new account of radio drama from the Depression to the Cold War. In this sweeping exploration of dramatic conventions, Verma investigates legendary dramas by the likes of Norman Corwin, Lucille Fletcher, and Wyllis Cooper on key programs ranging from *The Columbia Workshop*, *The Mercury Theater on the Air*, and *Cavalcade of America* to *Lights Out!*, *Suspense*, and *Dragnet* to reveal how these programs promoted and evolved a series of models of the imagination. With close readings of individual sound effects and charts of broad trends among formats, Verma not only gives us a new account of the most flourishing form of genre fiction in the mid-twentieth century but also presents a powerful case for the central place of the aesthetics of sound in the history of modern experience.
