Peasants and Globalization A. Haroon Akram-Lodhi

2012-08-21 In 2007, for the first time in human history, a majority of the world's population lived in cities. However, on a global scale, poverty overwhelmingly retains a rural face. This book assembles an unparalleled group of internationally-eminent scholars in the field of rural development and social change in order to explore historical and contemporary processes of agrarian change and transformation and their

consequent impact upon the livelihoods, poverty and well-being of those who live in the countryside. The book provides a critical analysis of the extent to which rural development trajectories have in the past and are now promoting a change in rural production processes, the accumulation of rural resources, and shifts in rural politics, and the implications of such trajectories for peasant livelihoods and rural workers in an era of globalization. Peasants and Globalization thus explores continuity and change in the debate on the 'agrarian question', from its early formulation in the late 19th century to the continuing relevance it has in our times, including chapters from Terence Byres, Amiya Bagchi, Ellen Wood, Farshad Araghi, Henry Bernstein, Saturnino M Borras, Ray Kiely, Michael Watts and Philip McMichael. Collectively, the contributors argue that neoliberal social and economic policies have, in deepening the market imperative governing the

contemporary world food system, not only failed to tackle to underlying causes of rural poverty but have indeed deepened the agrarian crisis currently confronting the livelihoods of peasant farmers and rural workers. This crisis does not go unchallenged, as rural social movements have emerged, for the first time, on a transnational scale. Confronting development policies that are unable to reduce, let alone eliminate, rural poverty, transnational rural social movements are attempting to construct a more just future for the world's farmers and rural workers.

Vasil'evich Chai[anov 1986  
The work of A. V. Chayanov is today drawing more attention among Western scholars than ever before. Largely ignored in his native Russia because they differed from Marxist-Leninist theory, and neglected in the West for more than forty years, Chayanov's sophisticated theories were at last published in English in 1966. That trenchant is reprinted in this Wisconsin paperback edition, which includes a new introduction by the sociologist Teodor Shanin, of the University of Manchester, one of the world's leading Chayanov scholars. The Wisconsin edition will be essential reading for political scientists, anthropologists, and all whose interests include peasant studies, Third World development, and women's studies. "The past two decades have seen the emergence of a whole new field called 'peasant studies' and, along with those of Karl Marx, Chayanov's ideas have been central to its development. . . . The publishers are to be

commended for re-issuing the book with both old and new introductions and making it available as an affordable paperback for students. The work is a classic."--Times Higher Education Supplement  
*The Theory of Peasant Co-operatives* Alexander Chayanov  
2020-11-26 The Theory of Peasant Co-operatives is the first translation of Chavanov's study of the transformation of the peasant economy within a market economy, and his prescription for the development of Russian agriculture. Predicting remarkably accurately the negative aspects of Stalin's collectivization programme, the hook offers a realistic alternative. Chavanov argues that the success of the co-operative system is dependent on combined development linking diverse form'. of farming organization. Although written in the 1920s, the theoretical concepts and practical insights Chavanov offers are directly relevant to the current restructuring o Soviet agriculture, as well as to

debates about smallholders in the Third World and the so-called 'informal economies' of industrial societies. The book is likely to become an important text for students of sociology, development studies and Soviet studies.

*Peasant Economics* Frank Ellis 1993-11-25 This is a revised and expanded edition of a popular textbook on the economics of farm households in developing countries. The second edition retains the same building blocks designed to explore household decision-making in a social context. Key topics are efficiency, risk, time allocation, gender, agrarian contracts, farm size and technological change. For

these and other topics, household economic behaviour represents the outcome of social interactions within the household, and market interactions outside the household. A new chapter on the environment combines exposition of economic tools not previously covered in the book with examination of household and community decision-making in relation to environmental resources.
