Making Comprehension

Connections: Look, Listen, and Link!

effectively combines the senses for greater academic success by providing everything the brain needs for comprehension and memory retention-visual, verbal, auditory, and kinesthetic input. This easy-to-follow program provides colorful and simple icons in the form of posters that help learners remember

concepts without the help of words. It also provides learners with multiple ways to remember and understand the comprehension skills and strategies, using songs and other active learning experiences. The songs are featured on an Audio CD and provided in print form in the Teacher's Guide and on transparencies. A separate Teacher Resource CD contains all of the reproducibles and a professional development DVD is also included that shows how to implement the lessons. This resource is correlated to the Common Core State Standards.

The "UnWorkbook" Becky Daniel 2005-04-29 This book is a way to get students moving, making, and exploring as they learn essential reading skills and strategies. Includes teacher resource pages with activity suggestions, as well as student pages with hands-on projects drawing from brain-compatible research.

The Oxford Handbook of Creativity and Education Jen Katz-Buonincontro 2025-04-08

The Oxford International Handbook of Creativity and Education brings together cutting-edge scholarship about the global trends and future directions of creativity in education. Diverse models and frameworks capture the state of the field with a focus on cognitive, social, and cultural areas of creativity in education. Barriers and supports to creativity are examined in educational policy, assessment, curriculum, classroom environments, and school contexts. This handbook is designed to propagate new research and applications in the field by helping students, researchers and program evaluators understand and apply these models of creativity to how students, teachers and leaders enact creativity in learning, teaching, and leading.

The handbook will inspire new work to advance the study and practice of creativity in education. Section I provides an overview of creativity frameworks, models, and pedagogies of education to anchor the handbook. Research on creativity in students, teachers, and schools are discussed in Section II. Culture and communities of creativity are explored in depth in Section III. Section IV covers creativity in academic disciplines like art, music, math, science, and engineering. Lastly, Section V provides thought-provoking chapters on researching education.

Theories of Creative Writing Studies Ge Hongbing

2025-08-15 This book provides a groundbreaking approach to creative writing theory, offering a comprehensive exploration of its core principles and methodologies. Focusing on creative writing as

an ontological practice, it redefines the essence of literature and writing, while integrating new perspectives on AI-assisted writing, creative industries, and writing pedagogy. This work combines Chinese and global views to address the pressing need for a systematic theoretical framework in the field of creative writing. It is intended for graduate students, researchers, and educators in creative writing, literary studies, and cultural industries. The book offers valuable insights into the evolving landscape of creative writing theory and its application in education, industry, and culture. Key features include its original theoretical framework, an interdisciplinary approach that connects theory and practice, and the exploration of AI's impact on creative writing. This book is a must-have resource for advancing both academic and practical understanding of creative writing.

The Skill Approach in Education Mehmet Serdar Erciş 2018-07-27 Today, information and technological developments grow at a rapid pace. Social and political life becomes more and more complicated and, in this process, active citizenship becomes more essential. Knowledge-driven changes in society and economies require individuals to quickly acquire new skills. Otherwise, it is increasingly difficult for employees to adapt to business life and to find a job. Education has to take account of these circumstances, adapt to the rapid developments in the world and educate individuals to continue lifelong learning. For this, skills such as active and independent learning, assertiveness, creativity, self-improvement, lifelong learning are important. Skill teaching differs from knowledge teaching. Skill is the transfer of knowledge to practice. This process involves a learning process that requires the steps of researching, planning, controlling and correcting. The

knowledge should be organized, integrated, transferred into practice, mental and physical resources should be activated, and knowledge use should be demonstrated in practice in order to improve the skill. This book contributes to the teaching of skills and includes basic concepts and skills, language skills, science and mathematics skills, psycho-social skills and visual arts skills. It also explains how to teach skills, how to prepare for activities and how to implement activities in educational settings. These applications are intended to draw attention to skill teaching, to raise educators, to increase the success of education, to improve the skills of students, and to enable them to use the skills they have learned in school outside of school and in complex tasks.
