Green Building Products Alex Wilson 2006

Interest in sustainable, green building practices is greater than ever. Whether concerned about allergies, energy costs, old-growth forests, or durability and long-term value, homeowners and builders are looking for ways to ensure that their homes are healthy, safe, beautiful, and efficient. In these pages are descriptions and manufacturer contact information for more than 1,400 environmentally preferable products and materials. All phases of residential construction, from sitework to flooring to renewable energy, are covered. Products are grouped by function, and each chapter begins with a discussion of key environmental considerations, and what to look for in a green product. Over 40% revised, this updated edition includes over 120 new products. Categories of products include: Sitework and landscaping Outdoor structures Decking Foundations, footers and slabs Structural systems and components Sheathing Exterior finish and trim Roofing Doors and windows Insulation Flooring and floor coverings Interior finish and trim Caulks and adhesives Paints and coatings Mechanical systems/HVAC Plumbing, electrical and lighting Appliances Furniture and furnishings Renewable energy Distributors and retailers An index of products and manufacturers makes for easy navigation. There is no more comprehensive resource for both the engaged homeowner and those who design and build homes.

Strategic Alliance Management Brian Tjemkes 2017-09-19 Strategic alliances - partnerships between separate organizations to share resources collaboratively toward mutually beneficial goals - are an important management instrument, but one that is difficult for firms to manage. Among many desirable outcomes, alliances can reduce costs, provide access to new technology, and improve research and development endeavours, though collaborative arrangements come with risks, peril, and adversities. This renewed and re-worked text connects theory to practice to help understand

this important business practice. Strategic Alliance Management presents an academically grounded alliance development framework, detailing eight stages of alliance development with consideration for specific management challenges. For each stage, readers are presented with state-of-the-art theoretical insights, evidence-based managerial guidelines and a business case illustration. Additional chapters detail on contemporary alliance management challenges, including co-opetition and business eco-systems. Other chapters highlight the role of alliance professionals, alliance capabilities and paradoxical challenges in alliance relationships. This second edition retains a blend of academic knowledge and practical examples, while updating case examples and adding five new chapters on emerging alliance topics. This book remains vital reading for business students and professionals interested in strategic management.

1000 New Designs and Where to Find Them

Jennifer Hudson 2006-07-13 "The following pages comprise a sourcebook of over 1000 designs since the turn of the century. It is intended as a tool not only for the consumer, but also for those seeking inspiration in their own design work. Each object is presented with a caption providing full technical details, as well as the websites of the manufacturers, or designers where relevant. Commentaries throughout shed light on the work of personalities and on trends, making the book more than just a catalogue of desirable objects." -BOOK JACKET.

Human Factors and Ergonomics in Consumer Product Design Waldemar Karwowski 2011-06-22 Every day we interact with thousands of consumer products. We not only expect them to perform their functions safely, reliably, and efficiently, but also to do it so seamlessly that we don't even think about it. However, with the many factors involved in consumer product design, from the application of human factors and ergonomics principles to reducing risks of malfunction and the total life cycle cost, well, the process just seems to get more complex. Edited by well-known and well-respected experts, the two-volumes of Handbook of Human Factors and Ergonomics in Consumer

Product Design simplify this process. The first volume, Human Factors and Ergonomics in Consumer Product Design: Methods and Techniques, outlines the how to incorporate Human Factors and Ergonomics (HF/E) principles and knowledge into the design of consumer products in a variety of applications. It discusses the user-centered design process, starting with how mental workload affects every day interactions with consumer products and what lessons may be applied to product design. The book then highlights the ever-increasing role of information technology, including digital imaging, video and other media, and virtual reality applications in consumer product design. It also explores user-centered aspect of consumer product development with discussions of user-centered vs. task-based approach, articulation and assessment of user requirements and needs, interaction with design models, and eco design. With contributions from a team of researchers from 21 countries, the book covers the current state of the art methods and techniques of product ergonomics. It provides an increased knowledge of how to apply the HF/E principles that ultimately leads to better product design.

Handbook of Human Factors and Ergonomics in Consumer Product Design, 2 Volume Set Waldemar Karwowski 2020-05-18 A comprehensive resource, this handbook covers consumer product research, case study, and application. It discusses the unique perspective a human factors approach lends to product design and how this perspective can be critical to success in the market place. Divided into two volumes, the handbook includes introductory and summary chapters on case study design, design methods and process, error and hazards, evaluation methods, focus groups, and more. It discusses white goods, entertainment systems,

personnel audio devices, mobile phones, gardening products, computer systems, and leisure goods.
