**The Encyclopedia of Physics** Robert Martin Besançon 1974 Concise, signed articles--most of them including bibliographic references--on physics in general, its major areas, divisions, and subdivisions as well as related topics such as astrophysics, geophysics, and biophysics. Intended for physicists who need information outside their special field of interest, librarians, teachers, engineers, and other scientists "who encounter physical concepts in pursuit of their profession."--Pref. As a rule, the technical level of the writing is higher for the more specialized areas than for the general topics. Useful cross references. Indexed. Published 1974.

**University of California, Berkeley, Physics Problems, with Solutions** Min Chen 1974

Chemical Thermodynamics M L McGlashan 2007-10-31 Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research. Written by experts in their specialist fields the series creates a unique service for the active research chemist, supplying regular critical in-depth accounts of progress in particular areas of chemistry. For over 80 years the Royal Society of Chemistry and its predecessor, the Chemical Society, have been publishing reports charting developments in chemistry, which originally took the form of Annual Reports. However, by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born. The Annual Reports themselves still existed but were divided into two, and subsequently three, volumes covering Inorganic, Organic and Physical Chemistry. For more general coverage of the highlights in chemistry they remain a 'must'. Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry. Some titles have remained unchanged, while others have altered their emphasis along with their titles; some have been combined under a new name whereas others have had to be discontinued.
