The Greatest Show on Earth Richard Dawkins 2009-09-22 Richard Dawkins transformed our view of God in his blockbuster, *The God Delusion*, which sold millions of copies in English alone. He revolutionized the way we see natural selection in the seminal bestseller *The Selfish Gene*. Now, he launches a fierce counterattack against proponents of "Intelligent Design" in his New York Times bestseller, *The Greatest Show on Earth*. "Intelligent Design" is being taught in our schools; educators are being asked to "teach the controversy" behind evolutionary theory. There is no controversy. Dawkins sifts through rich layers of scientific evidence—from living examples of natural selection to clues in the fossil record; from natural clocks that mark the vast epochs wherein evolution ran its course to the intricacies of developing embryos; from plate tectonics to molecular genetics—to make the airtight case that "we find ourselves perched on one tiny twig in the midst of a blossoming and flourishing tree of life and it is no accident, but the direct consequence of evolution by non-random selection." His unjaded passion for the natural world turns what might have been a negative argument, exposing the absurdities of the creationist position, into a positive offering to the reader: nothing less than a master's vision of life, in all its splendor.

China's Change: The Greatest Show On Earth Hugh Peyman 2018-03-14 'Importantly, China's Change: The Greatest Show on Earth provides a welcome contrast to such fashionable pessimism ... demolishes a series of popular urban myths ... and a very convincing case he makes. This, to my mind, is a wholly original approach to understanding present-day China and the book is well worth reading for this alone. ... readers are likely to end up considerably wiser about how the Chinese economy has developed and how it currently works. It's difficult to do justice to the exceptionally wide-ranging scope of the book. It is, furthermore, well-written (as befits a former journalist) and highly readable. ... a useful corrective for the innate pessimism which has pervaded so much Western economic and financial commentary in recent years.' The Society of Professional Economists (SPE) China's Change injects timely, original ideas into the world's most important, if confused, debate over how to manage the twin challenges of anaemic economic growth and

accelerating global disruption. Change is the cry from the US to Europe, Asia to Australasia. The snag is the West has no playbook to help. China however, to regain control of its future, has regularly reinvented itself by understanding change's nature through traditional philosophy. This is not idle conjecture. It is what China has done time and again, including most recently with COVID-19 where it identified clear goals, priorities and means to bring the coronavirus under control. This book argues it is time to 'Look at China' but stresses China's approach to managing change only supplies the process not individual policies: the how not the what. Policies have to be created locally. In managing change, traditional thought is China's X-Factor, the key to China's record-breaking economic transformation. To grasp this, China's Change provides an understanding of China's past, present and future through its philosophy, history, economics, business, politics, prospects and impact in a way that no other book has done. Two big global questions are answered. Can other countries, firms and individuals find paths out of their dim twilight by adapting China's change process? Can China continue to create one-third of world growth, more than the US, EU and Japan combined, to help cure the last decade's global economic malaise? China's roadmap for change enables anyone to navigate growing global disruption. Ironically China's process is built on such ignored-in-the-West ideas as long-term thinking, clear priorities, gradualism and non-ideological pragmatism that earlier powered two centuries of Western economic dominance. If the West and rest of Asia learn from China to manage change, the next global surprise could be another turning of the tables. There is no end to history, only more turns of the wheel: for now China's Change is again the Greatest Show on Earth. Related Link(s)
