Local Education Order Stephen Hester

2000-01-01 The studies in this book take an ethnomethodological approach to educational phenomena. Ethnomethodology's concern is with the locally accomplished and situated character of social order. With reference to educational phenomena, this means that ethnomethodology investigates how the 'natural facts' of educational life, such as daily activities in school classrooms, are produced as such in the first place, rather than taking for granted the recognisability of these facts and then theorising

their explanation. In this sense, ethnomethodological studies contrast markedly with other approaches to the study of education. Each of the chapters in the book consists of a new and original study. Collectively, they exhibit the continuing vitality of this tradition and demonstrate ethnomethodology's special commitment to the analysis of educational phenomena as locally ordered and accomplished.

A Thematic Access-Oriented Bibliography of Jesus's Resurrection Michael J. Alter

2019-12-31 The keystone of Christianity is Jesus's physical, bodily resurrection. Present-day scholars can be significantly challenged as they forage through voluminous documents on the

resurrection of Jesus. The literature measures well over seven thousand sources in English-language books alone. This makes finding specific sources that are most relevant for specific scholarly purposes an arduous task. Even when a specific book is relevant, finding the parts of the book that are most relevant to the resurrection rather than other topics often requires additional effort. A Thematic Access-Oriented Bibliography of Jesus's Resurrection addresses these challenges in several ways. First, the bibliography organizes more than seven thousand English sources into twelve main categories and then thirty-four subcategories, which are designed to help you find the most relevant literature quickly and efficiently. Embedded are pro and con arguments which support efficient access through brief annotations and then annotate the diversity and complexity of the field of religion by including sources that represent a diverse range of views: theistic (e.g., Christian, Jewish, Muslim, etc.),

agnostic, and nontheistic. The objective of this bibliography is to provide convenient access to relevant sources from a variety of perspectives, allowing you to browse or find the one source accurately and with ease.

Mikell P. Groover 2010-01-07 Engineers rely on Groover because of the book's quantitative and engineering-oriented approach that provides more equations and numerical problem exercises. The fourth edition introduces more modern topics, including new materials, processes and systems. End of chapter problems are also thoroughly revised to make the material more relevant. Several figures have been

enhanced to significantly improve the quality of artwork. All of these changes will help engineers better understand the topic and how to apply it in the field.
