**Tolley's Handbook of Disaster and Emergency Management** Tony Moore 2007-01-18 The Civil Contingencies Act 2004 modernised the UK's approach to disaster and emergency management, taking into account the kinds of threats the country faces in the 21st century, including terrorist threats and threats to the environment. This third edition of the Tolley's Handbook of Disaster and Emergency Management has been fully updated to cover the topics and themes reflected in the Act, and collates all the key components of disaster and emergency planning for both the public and the private sector, covering both man-made and natural disasters. Written from a UK practitioner's point of view, using case studies and examples, it helps readers to understand and formulate disaster and emergency policies and systems for their workplace. Its practical approach will help organizations to ensure business continuity and safeguard the health and safety of their staff in the event of a disaster. The new edition has been updated in line with the latest legislation: \* Civil Contingencies Act 2004 \* Amendment to the Control of Major Accident Hazards (COMAH) Regulations \* Corporate Manslaughter Bill

Tolley's Risk Assessment Workbook Series: Utilities Peter Ellis 2020-12-14 Risk assessment is the key to successful management of health and safety at work. Risk assessments are carried out in order to quantify and evaluate the significance of workplace hazards so that appropriate control measures can be put in place. Usually, a written record of the assessment is required, detailing the following information: \* The hazards - and how much risk is associated. \* The risk - with appropriate control measures. \* Deadlines - to follow-up the risk assessment to ensure the risk is managed. Failure to carry out risk assessments - punishable by law - is often due to lack of a suitable risk assessment system. Tolley's Risk Assessment Workbook - Utilities provides that system, both in the form of key background information on how to carry out a risk assessment - understanding relevant legislation and regulations - but most importantly by providing: \* Checklists - highlighting key industry-specific hazards and control measures. \* Questionnaires - highlighting key questions the risk assessor should ask when analysing the risk posed by the hazard. \* Action Plans - to ensure the risk assessment is followed up and completed. The Workbook offers a practical risk assessment system: it shows you how to comply with the law and gives you the foundations of a logical procedure that can be understood easily, put into place quickly where necessary and adapted to your organisation's needs. Tolley's Risk Assessment Workbooks is a series of practical Workbooks providing you with all the information you need to conduct risk assessments in industry-specific areas including: Manufacturing, Retail, Leisure, Education, Offices, and Construction. A special Risk Assessment Workbook on Stress has also been developed in order to facilitate management of this issue which is of key concern to all organisations.

**Tolley's Handbook of Disaster and Emergency Management** Raj Lakha 2004 Now in its second edition, this unique title is still the ultimate comprehensive resource that standardises the principles and practice of disaster planning and emergency management. The area of disaster management is growing in significance and recognition for both public companies and private sector organisations. Tolley's Handbook of Disaster & Emergency Management: Principles & Practice is the only publication on the market that collates all the key components of disaster and emergency management in one handbook. It has been written specifically for professionals with responsibility for health and safety, crisis, disaster and emergency management and incident prevention. Expanded to include two new chapters, the title also features: Key legislation and regulations How to formulate a disaster and emergency plan The financial implications of disasters and emergencies Analysis of causation Case Studies ILO Code of Practice on prevention of major industrial accidents
