Liberal Hearts and Conservative Brains Ron Lipsman 2007 "Talk radio hosts seem to believe conservatives are from Mars and liberals are from Venus—two different species, in other words. Ron Lipsman's new book uses a mix of rational analysis and personal history to suggest there may be deeper psychological laws at work here that help shape our worldviews. He's on to something " -Elias Crim, Publishing Consultant.

Professor Lipsman argues for a correlation between age and political philosophy, which asserts that young people tend to gravitate toward liberalism while older people are usually more comfortable with conservatism; and that, additionally, among the people who change their political preference over time, more go from liberal to conservative than vice versa; and finally, he assesses the strengths of these trends; examines the most interesting counter-examples to these trends—namely, premature conservatives and aging liberals—and explains what motivates them; presents a history of the liberal/conservative divide in America and then augments it with an assessment of its current status as well as a prediction of its future; "An insightful and witty examination of the values and beliefs that divide liberals and conservatives in America today. A penetrating look at the concept of the 'aging liberal', especially as it pertains to the Jewish and academic communities." -Bruce Bartlett, nationally syndicated columnist

The Man Who Invented Conservatism Daniel J. Flynn 2025-08-19 Frank Meyer devised the blueprint for American conservatism—fusionism—championed by Barry Goldwater, Ronald Reagan, and so many to this day. Yet long before and far away, Communists in London chanted “Free Frank Meyer!” to block the deportation of a comrade who was their cause célèbre. Those fervent Marxists could never have predicted that their hero would one day provide the intellectual energy necessary to propel conservatives to political power. The Man Who Invented Conservatism unveils one of the twentieth century’s great untold stories: a Communist turned conservative, an antiwar activist turned soldier, and a free-love enthusiast turned family man whose big idea captured the American Right. This intellectual migration coincided with a clandestine affair inside 10 Downing Street, service as a lieutenant to the man who later constructed the Berlin Wall, and neighborly chats with the pop-star and poet celebrity next door. Present at the creation of National Review, Meyer helped launch Joan Didion’s writing career. From H. G. Wells to Henry Kissinger to Milton Friedman, he rubbed shoulders with everyone who mattered. Having discovered Meyer’s previously unexamined correspondence in an old soda warehouse, Daniel J. Flynn documents this saga in *The Man Who Invented Conservatism*, exposing the rivalries, jealousies, friendships, and fights that shaped the movement and what it means to be a conservative today.

After the Last Man Toivo Koivukoski 1955-01-01 In this unique, enlightening monograph, Toivo

Koivukoski explores the circumstances that have led modern society to use the concept of progress as a surrogate cosmology that gives individuals a sense of place and purpose. By linking various historical paradigms from German Idealist philosophy to contemporary philosophies of technology, this work of political theory describes an alternative, immanent pattern of development that is, in a sense, driven by its own unintended consequences. The meditations outlined within this book map out the hypertext pathways of our global system, making its constitutive relations and underlying thought processes transparent. Koivukoski mirrors the new hyper-realities of electronic communications technologies by structuring the text in compact subchapters that are linked through an index of subjects that allows readers to "find their own philosophy" by jumping to areas of interest. If, as he argues, history understood in a linear, lockstep fashion is over, then the ways of developing concepts should change respectively so that the sorts of retrievals, anticipations, loops, and leaps that characterize nonlinear, networked thinking are consciously realized in an identity of form and substance.
